RESOLUTION NO. _____

ENTITLED: "A RESOLUTION AUTHORIZING THE MAYOR AND THE CITY CLERK TO SIGN A FINAL PLAT FOR THE SWEETGRASS 1ST FILING SUBDIVISION SITUATED IN THE N ½ OF SECTION 16, TOWNSHIP 13N, RANGE 66W, OF THE 6TH P.M., CHEYENNE, LARAMIE COUNTY, WYOMING (LOCATED SOUTH OF COLLEGE DRIVE AND EAST OF AVENUE C)."

WHEREAS, the Sweetgrass Land Co., Arp and Hammond Hardware Co., and Lummis Livestock Co, LLC, as owners of the subject property, have subdivided said land in accordance with the statutes in such cases made and provided; and

WHEREAS, the owners of the above described land, have caused a subdivision plat of said land to be made, acknowledged, and certified, particularly describing the lots, blocks, easements, and rights-of-way; and

WHEREAS, the above described subdivision plat has been presented to the City of Cheyenne Planning Commission for consideration; the Planning Commission has recommended that said plat be approved by the Governing Body; and the plat has been duly executed by the Planning and Development Department.

NOW, THEREFORE BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, THAT the subdivision described as Sweetgrass 1st Filing, Cheyenne, Wyoming, be and the same hereby is approved and confirmed as presented, and that the Mayor and the City Clerk be and are hereby authorized, empowered, and directed to execute said plat when the required Community Facility Fees have been paid in full pursuant to the Sweetgrass PUD Annexation Master Annexation Agreement, City Contract No. 6784.

PRESENTED, READ AND ADOPTED THIS _____ DAY OF

_____, 2018.

MARIAN J. ORR, MAYOR

(SEAL)
ATTEST:

CAROL INTLEKOFER, CITY CLERK

CITY COUNCIL STAFF REPORT - SUMMATION
Sweetgrass 1st Filing Final Plat

CASE NUMBER: UDC-18-00105-01

SUBDIVISION CODE: SWET01

PREPARED BY: Susana Montana

MEETING DATES: May 7, 2018 – Planning Commission
May 29, 2018 –City Council 1st Read
June 5, 2018—Public Services Committee (1st read)
June 11, 2018—City Council (2nd and final reading)

REQUIRED DOCUMENTS SUBMISSION: The following required documents have been submitted and reviewed by staff: Application form with check list and cover letter; Final Plat; Traffic Impact Study for the 1st Filing; Community Facilities Impact Analysis; Drainage Report; and Final PUD Standards and Guidelines and associated Maps: Site Analysis Map, Land Use Map, Monument and Fence Map, Phasing Diagram, Master Trails Map, and Sketch Master Plan.

RECOMMENDATION: On May 7, 2018, the Planning Commission voted 4 to 0 to recommend conditional-approval of the Sweetgrass 1st Filing Final Plat Subdivision with the following 4 conditions:

1. The plat shall be amended to reflect the City Surveyor's, County Assessor's and WYDOT's required corrections;
2. Lot 445 of Block 7 shall be renamed to Lot 8;
3. Per WYDOT comments, correct the bus turning radii to a 40-ft radius instead of a 35-ft radius to maintain lane confinement for the proposed roadway lane configuration for the two College Dr intersections.
4. Amend the greenway segment in Block 1 to reflect the greenway routes/alignment approved by the City's Community Parks and Events Department.

Since the May 7, 2018, Planning Commission decision, the Applicant has made the corrections required of Conditions 1 and 2. Condition Number 3 would be addressed during Site Plan review for development of the Village Center Block 1. Condition Number 4, which would require removing the Block 1 greenway route along the East College Drive frontage eastward from the LCCC tunnel to Sweetgrass Drive and then south along the west side of Sweetgrass Drive to East Murray Road, is no longer necessary because the City's Greenway and Community Recreation and Events staff have agreed to accept this eastern segment, after its construction by the Applicant as part of the plat infrastructure improvement, and would add it to the City's Greenway program for operation and maintenance.

Therefore, in order to meet the three UDC Article 2.1.3.d review criteria for a Final Plat, staff recommends approval of the Final Plat with no conditions of approval.

PROJECT: Sweetgrass 1st Filing Final Plat

WORK DESCRIPTIONS: Final Plat subdivision for 68.74-acres of unplatted land within recently annexed City jurisdiction land, subject to a concurrent City rezoning PUD approval.

LOCATION:

Legal Description: Situated in the N 1/2 of Section 16, Township 13 North, Range 66 West., 6th P.M., Cheyenne, Laramie County, Wyoming.

Location: This land is located to the southeast of the intersection of E. College Drive and Avenue C.

Address: Not Addressed but immediately south of 1340 E College Drive (Laramie County Community College--LCCC).

SIZE: 68.74-acres

CURRENT ZONING: County Sweetgrass PUD

PROPOSED ZONING: City Sweetgrass PUD

EXISTING LAND USE: Grazing cattle, grasslands

PROPOSED LAND USE: Mixed use commercial and residential

TABLE 1: SURROUNDING LAND USES.

SURROUNDING	LAND USE(s)	ZONING	ANNEXATION STATUS
Northwest	Educational (LCCC)	LCCC PUD	County
Northeast	Agricultural (cattle grazing grasslands)	City AG-Agricultural (Reed-Lummis rezoning)	City (Reed-Lummis Annexation)
South	Agricultural (cattle grazing grasslands)	A2 (Agricultural)	County
East	Agricultural (cattle grazing grasslands)	A2 (Agricultural)	County
Northwest	Predominantly residential with some light industrial businesses	MU (Mixed Use) and LI (Light Industrial)	County
Southwest	Mixed commercial and residential	A2 (Agricultural) and AR (Agricultural Residential)	County

Source: Landmark Engineering LTD

EXECUTIVE SUMMARY:

This application is a Final Plat (FP) for 68.74-acres of a larger 2,349.54-acre Sweetgrass Community. A Concept Preliminary Plat for the entire Sweetgrass land area was approved by the City's Governing Body (City Council) on October 23, 2017. A Preliminary Plat for this 1st Filing was approved by the Council on February 26, 2018. This 1st Filing subdivision consists of

grassland located southeast of the City, immediately south of the Laramie County Community College (LCCC) campus.

This Final Plat (FP) can be evaluated by the City's Unified Development Code (UDC) and other City codes and standards because the Sweetgrass Planned Unit Development (PUD) Final Plan has not been adopted and because that PUD's regulations defer to the UDC's subdivision regulations for plat review. The PUD is "silent" on subdivision processes and regulations and Section 1, subsection B.4 states: *"If the PUD does not address a specific item, the most current edition of the Cheyenne UDC shall govern; otherwise, this PUD shall govern."*

The FP land has been annexed into the City. The Applicant is seeking concurrent action by the Governing Body to rezone the land with a City Sweetgrass PUD zoning designation and adoption of the Sweetgrass Planned Unit Development (PUD) zoning regulations called the Sweetgrass Final Planned Unit Development Standards and Guidelines. For the purposes of this staff evaluation, the FP can be evaluated to determine if the lots, land use, density, roads, easements, open space, trails, and other infrastructure generally reflect the land uses and internal neighborhood configurations of the Sweetgrass Preliminary PUD regulations that was adopted by the Planning Commission in October 2016 for this proposed new community (UDC-16-00509) and the FP can be evaluated to determine if it reflects the land and lot layout, land use, and infrastructure contained in the 1st Filing Preliminary Plat (UDC-18-00001).

Project Description. This Final Plat 1st Filing proposes a variety of land uses, including:

- Residential lots include 90 single-family, detached home lots and a single 7.67-acre lot (Block 4, Lot 1) which could accommodate apartment buildings, perhaps student housing.
- The northern portion of the FP, in Block 1, provides lots of varying sizes for retail, hotel, a fire station, a police station, a library and a church. The plat shows 13 non-residential lots in Blocks 1 through 3 along with 2 lots for access and utility easements.
- The northern Village Center provides 1.35-acres of private open space. Public greenways Tracts D, E and F include another 2.17-acres of trails.
- The southern residential neighborhood provides 3.37-acres of private open space and 2.62-acres of public greenway trails in Tracts H, J, K and L.

The City has approved the annexation of the entire 2,349.54-acre Sweetgrass community Site and the City's Governing Body and the Applicant have approved and recorded an Annexation Agreement (Development Agreement). However, until a rezoning to the City Sweetgrass Final PUD is approved by the Governing Body, no zoning is in place and, therefore, no final plat or

building permit can be issued for any development within the FP. As noted above, the Sweetgrass Final PUD and zoning map amendment has been submitted as a separate application and is being reviewed concurrently with this FP.

The evaluation of the FP contained in this report discusses potential impacts and mitigation measures needed and proposed by the Applicant to make the new Sweetgrass community a positive asset and resource for its residents, workers and visitors and for the City as well as make it a "good neighbor" to its surrounding lands, businesses and residents.

In summary, with the four conditions of approval recommended by staff, it is determined that this first phase of the Sweetgrass development proposal would provide a well-planned and well-designed new community in the City; one that is linked to adjacent County neighborhoods and does not stand in isolation of its more rural and/or older neighbors.

This first phase of the Sweetgrass community would be a unique "master planned" community in the area providing a balance of residential "sub-neighborhoods" or clusters of developments of a variety of housing and commercial developments to respond to current and emerging markets. Higher-density and smaller units of apartments and townhomes could be affordable and attractive to Laramie County Community College (LCCC) students, faculty, administrators, new households such as couples without children or young professionals, or "empty nester" households seeking a rural living environment. The single-family homes on lots ranging in size from 6,000 to 12,000 square feet (sf) could accommodate moderate-income, family-size households.

The FP Village Center would provide commerce in close proximity to residents and LCCC to provide convenience services and employment opportunities for residents and students of LCCC. The development would provide streets and trails connecting private open space and small park areas. All-in-all, this is an example of a well-planned, well-designed, holistic "smart growth" community for the City to accommodate its natural growth.

In order to meet the three UDC Article 2.1.3.d review criteria for a Final Plat, on May 7, 2018, the Planning Commission voted 4 to 0 to recommend conditional-approval of the Sweetgrass 1st Filing Final Plat Subdivision with the following 4 conditions:

1. The plat shall be amended to reflect the City Surveyor's, County Assessor's and WYDOT's required corrections;
2. Lot 445 of Block 7 shall be renamed to Lot 8;
3. Per WYDOT comments, correct the bus turning radii to a 40-ft radius instead of a 35-ft radius to maintain lane confinement for the proposed roadway lane configuration for the two College Dr intersections.
4. Amend the greenway segment in Block 1 to reflect the greenway routes/alignment approved by the City's Community Parks and Events Department.

However, since the May 7, 2018, Planning Commission decision, the Applicant has made the corrections required of Conditions 1 and 2. Condition Number 3 will be addressed when the first development of the Village Center Block 1 site plan is submitted. Condition Number 4, which would require removing the Block 1 greenway route along the East College Drive frontage eastward from the LCCC tunnel to Sweetgrass Drive and then south along the west side of Sweetgrass Drive to East Murray Road, is no longer necessary because the City's Greenway and Community Recreation and Events staff have agreed to accept this eastern segment, after its construction by the Applicant as part of the plat infrastructure improvement, and would add it to the City's Greenway program for operation and maintenance.

Therefore, in order to meet the three UDC Article 2.1.3.d review criteria for a Final Plat, staff recommends approval of the Final Plat with no conditions of approval.

BACKGROUND

The Lummis Family is seeking approval of the subject Final Plat for approximately 70-acres of their family's ranchland. The Final Plat represents the first step in the realization of a new community, called Sweetgrass, for the family's ranchland. The Lummis family has grazed cattle on this land for several generations and will continue to do so on the undeveloped portions of this PP land as construction progresses for the entire Sweetgrass community in phases over the next five decades. The cattle business is the family's economic and cultural heritage and the gradual development of the family's pastures into the Sweetgrass community is envisioned by the family as a new phase or element of their family's heritage. Therefore, the family intends this community, and the neighborhoods within, to be quality environments which contribute to the quality of life for the residents, workers, visitors and the City as-a-whole.

County PUD. The concept of Sweetgrass has been envisioned for at least two decades and was approved as a lower intensity and density mixed use Planned Unit Development by the County in 2013. The residential densities for the County PUD range from 4 dwelling units per acre to 24 units per acre for residential lots and non-residential uses and densities are similar to that proposed for the City PUD. However, to achieve those densities, a sanitary sewer system must be provided either by a private purveyor or a municipal entity. The Applicant was not able to extend South Cheyenne Water and Sewer District service to their land, so they sought to annex into the City to connect to the City's Board of Public Utilities (BOPU) system. BOPU has extended both water and sewer lines to the Sweetgrass Site. A sanitary sewer "lift station" is needed to serve the Site and completion of that facility is anticipated on August 1st to accommodate the intensity and density of development proposed in the FP.

Overall Sweetgrass Community. When rezoned, the City PUD Sweetgrass community would consist of general commercial land uses such as offices, regional retail, lodging, restaurant, entertainment and recreation businesses as well as neighborhood-serving retail and restaurant businesses which would provide up to 4.4 million square feet of non-commercial building area.

There would be public and private trails and a golf course. Residential uses would range from single-family, detached homes, townhomes, apartment complexes and student housing complexes serving the LCCC community. Residential densities would range from low (3 units per acre) to high (11 units per acre) to up to 5,000 dwelling units within the community. This 1st Filing FP would initiate the development of this broader master planned community. This is a welcome change from the 5-acre homestead lots bordering the northern and eastern edges of the City which cannot accommodate the City's anticipated growth over the next few decades.

STAFF EVALUATION

FINAL PLAT DATA: In reviewing, providing comments, and making recommendations and decisions on a proposed Final plat, the Staff, Planning Commission and Planning Commission shall use the following 3 criteria of Section 2.1.3.d of the UDC:

1. SUBSTANTIAL COMPLIANCE WITH PRELIMINARY PLAT – *The layout and design of the Final Plat is in substantial compliance with the approved Preliminary Plat considering the number of lots or parcels, street and block layout, and access, and any deviations in the Final Plat brings the application in further compliance with the Comprehensive Plan.*

PRELIMINARY AND FINAL PLAT COMPLIANCE

The Final Plat varies from the adopted Preliminary Plat in the following ways:

1. The northern "Village Center" features two lots, Lot 5 of Block 2 and Lot 3 of Block 3, which appear as stub-out roads to future development of lands to the west and east, respectively on the Preliminary Plat (PP). However, in this FP, these lots are to be "*reserved for future r/w / accessway(s) to remain under current ownership and granted hereon as ingress, egress, utility & drainage easements.*" Therefore, those two lots are private access easements. If, in the future, these two lots are to be granted to the City for public rights-of-way connecting to future connecting rights-of-way, this FP would need to be re-platted to affect this dedication to the City.
2. The townhome lots in Block 5 of the PP are shown as single-family lots on the FP.
3. One lot (Lot 13) in Block 6 of the PP is shown as two lots (Lots 13 and 14) in the FP.
4. Four lots in Block 7 (Lots 15-18) of the PP are shown as three lots (Lots 16-18) in the FP.
5. Four lots in Block 4 (Lots 21-24) of the PP are shown as five lots (Lots 22-26) in the FP.
6. Lots 6, 7 and 8 of the PP are reconfigured and the result is a Lot 6, 7 and 445 in the FP without explanation as to why one lot, Lot 445, is out of sequence.
7. Overall, lot shapes and sizes have changed.
8. Private and public greenway routes and sizes have changed.
9. Two street names have switched locations: Arrowleaf and Goodnight.

Staff Evaluation. **Complies.** These changes are deemed minor and the FP is deemed in substantial compliance with the approved PP.

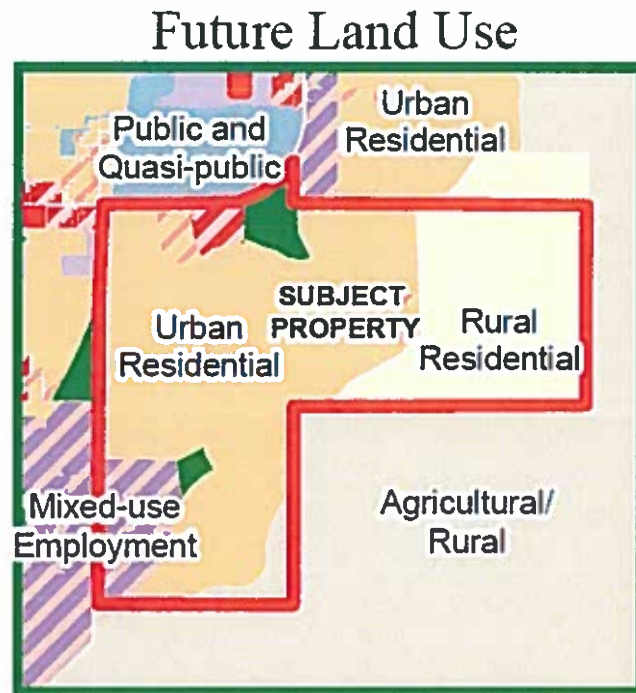

Figure 6 – Future Land Use Designations for Sweetgrass Area
Source: Cheyenne/Laramie County GIS Cooperative Program

The Sweetgrass 1st Filing Final Plat (FP) lies within the Urban Residential and Mixed Use Residential Emphasis portion of the future land use designation of PlanCheyenne.

Most of the FP land area is designated for Urban Residential development with a small “pocket” of Mixed Use Residential Emphasis land area in the northern portion of the FP. That northern area is proposed as a “Village Center”. The residential portions of the FP would reflect the Urban Residential portions of the PlanCheyenne future land use map designations. The FP land uses reflects the land use designations of the PlanCheyenne future land uses for this area. It also reflects the Preliminary Plat that was adopted in February 2018 and the proposed Sweetgrass Final PUD Standards and Guidelines that was submitted with a zoning map amendment to create the PUD zoning for the 2,300-plus-acre Sweetgrass community. That rezoning application is running concurrently with this FP for adoption. This is consistent with PlanCheyenne.

Staff Evaluation: **Complies.** The proposed FP would guide development to achieve desired characteristics for the Urban Residential designated lands. In the Sweetgrass PUD Concept Final Plan, eight (8) internal streets connect to neighborhood streets to the west which would not only connect the Sweetgrass community physically to its neighbors but would ensure that the Sweetgrass community is an integral part of the neighborhood as a whole. In the FP,

one of these 8 roads, East Murray Road, would connect to the neighborhood to the west in future development. Lot 1 of Block 4 is a 7.67-acre lot proposed for multi-family apartment buildings. There is a network of greenway trails bordering those uses. Two lots are set-aside for future road connections to east and west abutting future developments.

The northern portion of the FP is designated **Mixed Use Residential Emphasis** on the PlanCheyenne Future Land Use Map. The desired characteristics for that land use are as follows:

- *Provide a vertical or horizontal mix of uses on sites, including some multi-family residential.*
- *Integrate residential townhomes and apartments and other more urban development, generally in the core (highest-intensity area) of the mixed-use development in combination with some non-residential uses.*
- *Provide common usable or connected open space, parks, or plazas.*
- *Provide building height transitions and step-downs to be compatible with adjacent development.*

Staff Evaluation: **Does Not Comply.** The FP designates a large area, called the "Village Center" for commercial/non-residential development which would provide employment opportunities for City residents, for LCCC students, and for Sweetgrass residents who could walk to work. This land use is suitable for the FP neighborhood as well as for the larger Sweetgrass community and the LCCC student and employee populations. However, it does not provide a mix of residential uses. Rather, the southern portion of the FP provides a mixture of residential types and lot types. Perhaps this Village Center area could provide the type of housing over shops or live/work and loft housing that would be compatible with a walkable, dynamic village center.

The stated goal of the "village center" commercial node is to provide businesses that would serve LCCC students, faculty, other workers and visitors as well as residents of Sweetwater PUD.

Urban Service Boundary. The FP lies within the PlanCheyenne Urban Service Boundary. PlanCheyenne states: *"The Urban Service Boundary identifies lands within which that are expected to develop and be connected to water and sewer services and feature other urban amenities such as parks, trails, and protected open space. Lands outside the Urban Service Boundary should be limited, and future development is not encouraged in order to retain the rural character, protect agricultural uses, and maximize investments in services and infrastructure in the urban area."*

Staff Evaluation. **Complies.** The FP lies within the Urban Service Boundary.

2. MEETS CONDITIONS OF THE PRELIMINARY PLAT – *The Final Plat meets any conditions or modifications of the approved preliminary plat.*

Staff Evaluation: **Complies.** The Preliminary Plat was adopted by the Governing Body on February 26, 2018 with no conditions.

3. STANDARDS – *The application meets the purposes, intent, and applicable standards of Article 4.*

Staff Evaluation: **Would Comply with Adoption of the Sweetgrass Final PUD Regulations and the City-recommended amendment to the accompanying Master Trails Plan Map.** Article 4 are the subdivision regulations in the City's Unified Development Code (UDC). The Sweetgrass Final Planned Unit Development (PUD) Standards and Guidelines, if adopted by the Governing Body with the proposed zoning map amendment, would replace the standards of the UDC's Article 4 with the exception of the 40-plus sections of the UDC that are incorporated by reference into the PUD and with the exception of the portions of the UDC that are not specifically included in the PUD and, therefore, defer to the UDC standards that are "silent" in the PUD.

Paying for Infrastructure Related to Development Within the Sweetgrass Community

All new development within the City creates a demand for infrastructure and services which are to be provided to its residents, workers, business operators, visitors and its environs. This would include water, sewer, solid waste removal, police, fire, schools, parks and recreation services, among others. The City will work with individual developers within the Sweetgrass community to build the roads, parks, trails, fire station, police station, schools, and cultural facilities that make communities great--safe, attractive, livable, and healthy to attract investment and to support quality maintenance over its lifetime. The Sweetgrass Annexation Agreement, adopted and signed in February 2018, outlines fees to be paid by individual developers and the Sweetgrass land owner to assist the City in funding adequate infrastructure to properly service this community, as well as any off-site improvements needed.

Transportation Network

Appendix A of the Sweetgrass PUD Standards state that local streets shall use the UDC standards for the Residential Type A street section (UDC Figure 4-8) for public streets in residential parcels. The UDC Residential "A" type requires detached sidewalks of 5-foot width and a tree lawn of 7-foot width. Appendix A of the PUD identifies street section standards for College Drive, internal arterial, collector and rural-type streets. A Master Trails Plan identified a combined 11-miles of

private trails and 12.3-miles of City owned and maintained greenway trails within the Sweetgrass community. The FP includes sections of this larger greenway and private trails plan.

Community Facilities Enhancement and Impact Mitigation Fees

The Sweetgrass PUD Annexation Master Annexation Agreement (City Contract No. 6784) signed by the City and the Sweetgrass property owners in February 2018 identifies Community Facility Fees to be paid by individual developers within the Sweetgrass community. There are Land Acquisition and Infrastructure fees pursuant to Section 4.2 of the UDC to pay for the 79.6-acre City-owned community park within the Sweetgrass community as well as "base infrastructure supporting the Sweetgrass service area".

The Park Land Acquisition Fee is \$350 per acre of land within the plat. The Infrastructure Fee is \$350 per acre of land within the plat. There is a Non-residential Enhancement fee of \$1,100 per acre within the plat. For this 68.74-acre 1st Filing FP, the fees are shown in the table below.

Type of Fee Required	Ratio	Resource	Gross Estimate of Fee
Park Land Acquisition Fee	\$350 per acre in the plat	68.74 acres	\$55,824.00
Infrastructure Fee	\$350 per acre in the plat		\$55,824.00
Non-residential Enhancement Fee	\$1,100 per acre	17 acres excluding ROW and public lots within the Village Center	\$19,000
Residential Enhancement Fee	\$400 per dwelling unit	90 single-family lots Apartment Lot 1, Block 4 – number of units is unknown	\$36,000 for single family units
Total Fees for Plat (gross estimate)			\$166,648

According to the Annexation Agreement, ten percent of the total Land Acquisition and Infrastructure Fee for this Final Plat must be paid at the time of the signing of the plat. The remaining amount would be paid on a quarterly basis from the date of the signing of the plat until 100% of the fees have been paid.

The developer is responsible for the construction of streets and the installation of traffic control devices within the boundaries of its development. For this FP, a Transportation Impact Fee of \$2,000 per 1,000 square feet (sf) of commercial space shall be levied to the developer/owner of the lot. If office is developed, the fee would be \$1,500 per 1,000 sf of that space. For the residential development, each single-family dwelling unit would be levied \$1,250; for multi-family developments, \$1,000 would be levied per apartment unit. These fees are collected by the City at the time of Building Permit issuance.

As noted in the Sweetgrass PUD Community Facilities Impact Assessment document, the Sweetgrass community owner/Applicant will set-aside land for the following community facilities:

- A Fire Station
- A Police Station which may be shared with the Fire Station or a Library
- A branch library
- Two elementary school campuses
- A combined Middle School and High School campus
- A 79.6-acre City-owned, developed, operated and maintained community park
- 12.3 miles of City owned, developed, operated and maintained Greenway trails; and
- 11-miles of private trails developed by individual developers and then owned, operated and maintained by the homeowner association within which the trail is located.

For this FP, land is proposed to be set-aside in the Village Center lots for a fire station and police station as well as land for City Greenway trail segments.

Proposed Greenway Routes in Block 1

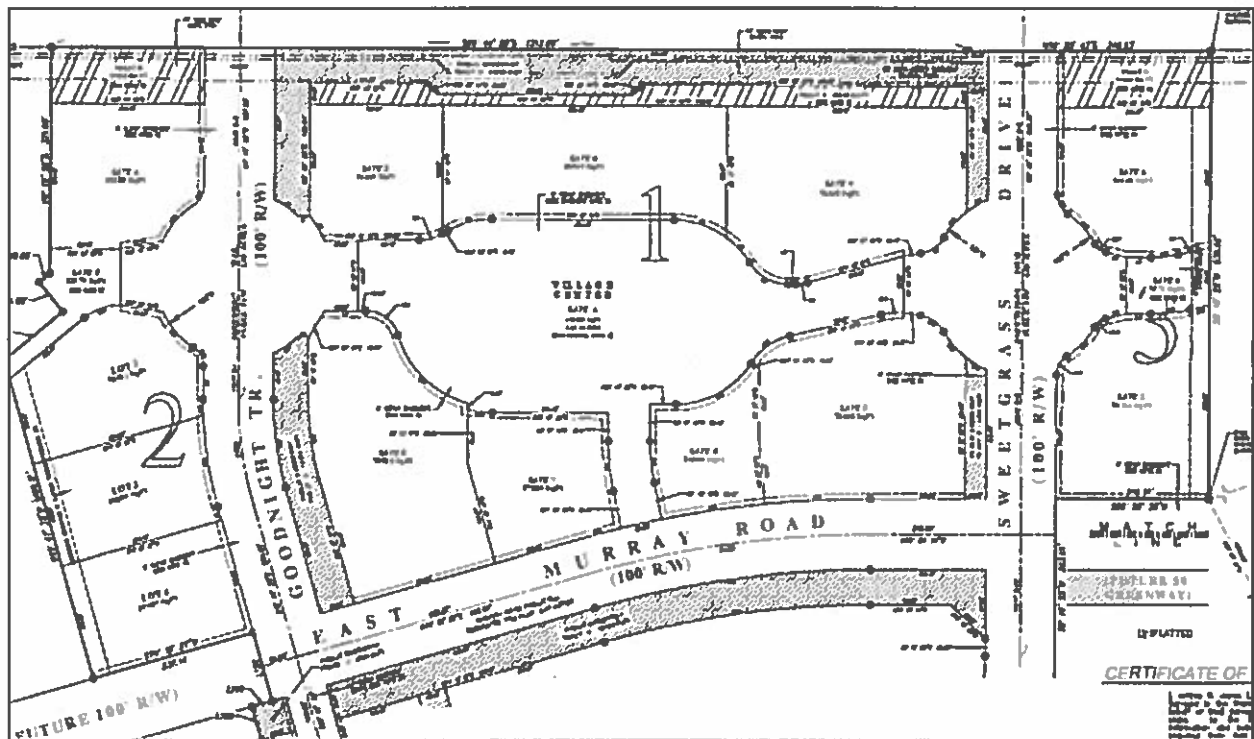

Figure 7: Greenway routes in Block 1.
Source: Sweetgrass Land Co.

The FP has General Notes that include note number 5.e that states: "All "Greenway Tracts (Tracts D, E, F, H, J, K & L) identified herein are hereby dedicated for the indicated purpose and shall be owned & maintained by the City of Cheyenne (See Note to Assessor)." The Note to Assessor

block states: "Greenway: All public greenway shown hereon (Tracts D, E, F, H, J, K & L) are hereby granted to the City of Cheyenne for greenway trail and recreation purposes (See General Note 5.e hereon). Ownership of said "Greenway Tracts" shall be propagated by recordation of an appropriate instrument meeting the form established in W.S. Sec.34-2 et seq." It is the City's understanding that the Applicant would develop the roads, private trails and the greenway trails. Once the greenway trails are built in each plat, they would be conveyed to the City for inclusion into the greenway program for operation and maintenance.

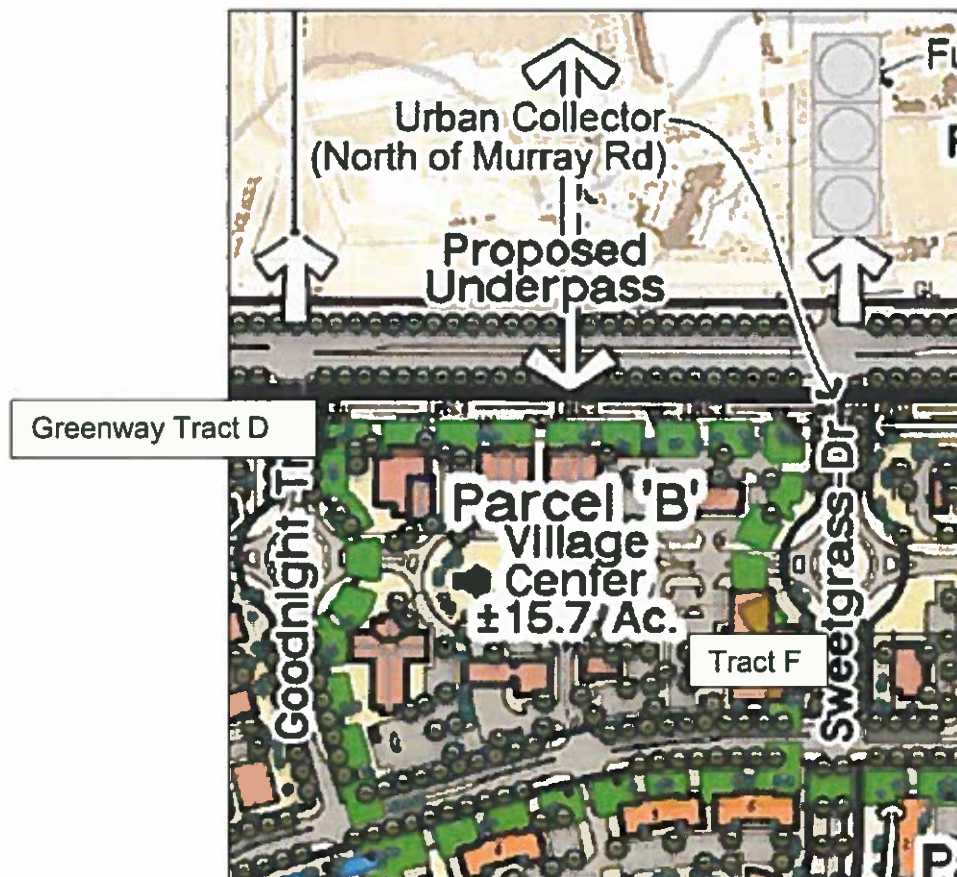

Figure 8: Greenway routes in Block 1

Source: Sweetgrass Land Co.

There was concern by the Greenway Program staff with accepting the eastern half of Greenway Tract D and its connecting Greenway Tract F shown above in Figure 8. The LCCC tunnel under College Drive is an important feature which would safely link the campus to Sweetgrass commercial, meeting, event and residential activity serving LCCC students and employees. It is the intent of the City to provide a greenway link from the tunnel entrance TO the Sweetgrass lands and then to the internal greenway and private trails within the community per the extensive trail system therein (see Figure 9 below).

Unfortunately, the tunnel “daylights” about 12 to 15-feet below grade of the Sweetgrass Block 1 land and the eastern route to Sweetgrass Drive is about 700-feet distant. To build this eastern route to Greenway Program and ADA standards, a long ramp would be needed to connect to the Sweetgrass Drive route and steps may be needed for pedestrian convenience (to avoid the long ramp needed for wheelchair access and bicycle convenience). The Applicant would bear the cost of installing the long ramp and retaining walls for proper slope on the eastern segment to Sweetgrass Drive. However, the City would maintain the ramp and steps which was a concern due to the extra labor in snow removal for steps which was believed to be costly and greater than the City believes the Greenway Program can afford.

This eastern segment of Tract D connects to a greenway segment on the western side of Sweetgrass Drive which then connects to the south side of East Murray Road. The City’s Community Recreation and Events Department would be responsible for maintenance of the greenways. Their staff notes that the eastern segment of Tract D and Tract F (see Figure 8) is redundant in that the western segment of Tract D leads to the greenway Tract E along the east side of Goodnight Trail which, in turn, leads to the south side of the East Murray Road greenway. The elevation differential for the western segment of Tract D from the tunnel to Goodnight Trail is much less and would not need a long ramp and stairs and, therefore, the costs of maintenance of a Greenway and ADA-compliant trail would be more affordable.

It is also noted that the Applicant may seek to delay building the Murray Road segment until the abutting 7-acre Block 4, Lot 1 is developed. The Applicant would build the greenway segment from Goodnight Trail across Murray Road to the segment along the west boundary of Lot 1 to another Sweetgrass Drive segment (see Figure 9 below). There is concern that the eastern greenway segment from the LCCC tunnel to Sweetgrass Drive and south to Murray Road would terminate without a link to the greenway segment along the west boundary of that Lot 1 and along the east boundary of Lot 1 to Sweetgrass Drive. Pedestrian, wheelchair and bicycle travel would have to take place on sidewalks.

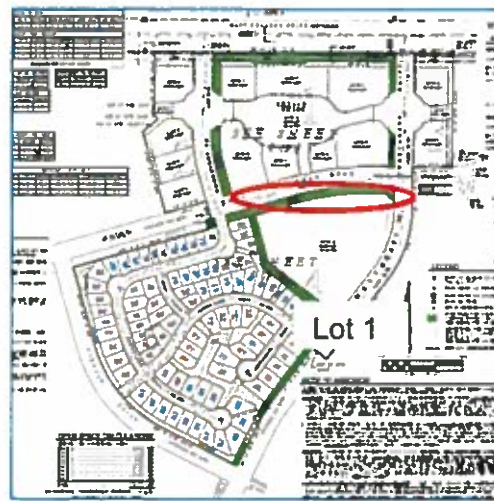

Figure 9: Murray Road Greenway segment above Block 4, Lot 1.

Source: Sweetgrass Land Co.

After the Planning Commission review of the plat on April 2nd, on May 16th City staff met with Applicant representatives to explain City concerns about maintenance of the ramps and steps of the eastern route from the LCCC tunnel. In this meeting, after considerable discussion, City staff agreed to accept both the east and west greenway route from the LCCC tunnel for operation and maintenance after the Applicant built these segments and conveyed it to the City for inclusion into the greenway system. It was assumed by City staff that the greenway segments shown on the plat would be built by the Applicant or developers to the City's greenway standards and then conveyed to the City; the City would not be building the greenways within the Sweetgrass development.

In the same May 16, 2018 meeting, the Applicant agreed to revise the Planned Unit Development (PUD) Master Trails Plan Map to reflect the City's recommended reduced greenway routes through the Sweetgrass development as shown in green color on Figure 9.

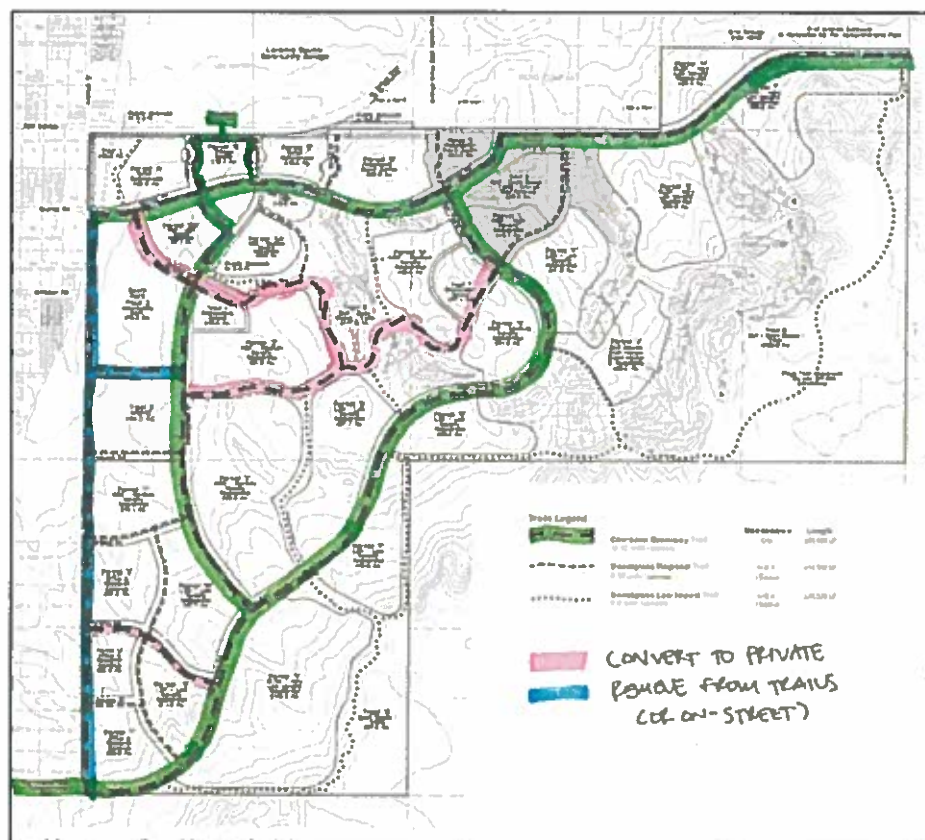

Figure 9: City Greenway routes shown in green on the Master Trails Plan Map.
Source: Landmark Engineering LTD

Community Facility Requirements:

The FP provides 9 private open space/trail Tracts as well as 7 public greenway trails connecting the commercial and residential lots. Block 1 provides lots proposed to be dedicated for a police and fire station, a library and other commercial uses. The Sweetgrass Annexation Agreement outlines development fees that are to be paid by developers of each subdivision for public infrastructure such as streets, greenways and parks.

COMMENTS ON THE SECOND (REVISED) SUBMITTAL

City Surveyor: Engineering Department, Jack Studley

1. Boundary data and legal descriptions appear in order.
2. On Sheet 1: the coordinates for the POB are overlapped by the corner tie data and undiscernible. This needs to be rectified.
3. On Sheet 2: the coordinates for the NE corner of Tract C are missing the decimal figures. This should be corrected.
4. For those parcels to be conveyed into City ownership, it is my recommendation that fully executed deed conveyance documents be required for recording along with the final plat map recording. [This has been corrected and the changes are reflected in the attached 4th submittal of the Final Plat dated May 8, 2018.]

County Assessor: Laramie County Assessor, Clarice Blanton

In the Dedication the Book and Page is missing for the excepted portion. [Has been addressed.]

WyDOT: WyDOT, Randy Griesbach Comments Attached 04/25/2018

1. Monuments for the development per the dedication need to be set along the exterior boundary with College Drive. [This has been addressed.]
2. WYDOT would like to see stormwater pre and post development rates for 2,5,10, 20-year events along with 50 and 100-year events in a summary form for review. Limit stormwater discharge to not greater than historic rates. [This has been addressed.]
3. Greenway underpass is shown as "future" on the plans. WYDOT would like to see the underpass developed early as part of the first improvements to accommodate pedestrian crossing of College Dr. Currently there is a path/sidewalk extension along the east side of Sweetgrass Dr that ties into College Dr at the end of the radius. This location looks problematic and undesirable in that it may promote at grade crossings of College Dr. Further, the break in the median island at the College & Sweetgrass intersection would not work for pedestrian alignment with future signalization. A review of the turning template for a 23 ft wheelbase school bus shows a need for 40 ft radii instead of 35 ft radii to maintain lane confinement for

the proposed roadway lane configuration for the two College Dr intersections. [The turning alignment for buses will be addressed at the site plan phase of development of this plat.]

4.Any work in the WYDOT R/W will need permit or license. Required landscaping, fencing or storm water agreements need to be between the City of Cheyenne and WYDOT. [For informational purpose.]

5.Identify Wyoming State Highway 212 R/W on plat map. [This has been met.]

MPO: Metro Planning Office (MPO), Nancy Olson

1.Last fall for the very first time a dedicated 6th penny amount of \$800,000 was approved to maintain the City of Cheyenne's current 40 + miles of trails and Greenway. MPO is not concerned with 'building' the trails, referring to the agents comment of "trails will be installed at the time of roads being built". It is the fact of MAINTAINING those trails in perpetuity that concerns us. [For informational purpose.]

2.The MPO feels agrees R. Zita and T. Moore's previous comments that the approved plan with only the green marked trails are what the City is willing to maintain; the many other trails indicated as public are beyond that threshold. [See Figure 9 as the revised Sheet 6 of the PUD Master Trails Plan.]

Urban Planning: Urban Planning, Richard Zita

According to the Applicant's engineer, the eastern portion of the greenway connecting to the College Rd. tunnel from LCCC has a significant elevation change requiring steps. This does not meet ADA requirements and, therefore, cannot be included as a segment of the City's greenway trail. Therefore, the segment of trail on the final plat from the tunnel eastward to Sweetgrass Drive and south to Murray must remain private and not greenway. [This has been addressed post-Commission approval and prior to submittal of the plat to Council.]

OTHER COMMENTS RECEIVED: None

Attachment A: Sweetgrass 1st Filing Final Plat (Sheets 1 through 3).

DOMESTIC WATER & SEWAGE SERVICE PROVIDED BY CITY OF CHRYSTIANE BOUP - FIRE PROTECTION TO BE PROVIDED BY CHRYSTIANE, FIRE & RESCUE - THE SURFACE ESTATE OF THE LAND TO BE SUBDIVIDED IS SUBJECT TO FULL AND EFFECTIVE DEVELOPMENT OF THE MINERAL ESTATE
