

STAFF REPORT - SUMMATION

Center Point Subdivision Preliminary Plat Process

CASE NUMBER(s): UDC-19-00391

SUBDIVISION CODE: CNPT02

PREPARED BY: Tawn Hillenbrand

MEETING DATES:

Planning Commission:	August 5, 2019
City Council:	August 12, 2019
Public Service Committee:	August 20, 2019
City Council:	August 26, 2019

REQUIRED DOCUMENTS SUBMISSION: The following required documents have been submitted and reviewed by staff:

- Master Application with owner's signature; Preliminary Plat Map; Drainage Worksheet; Transportation Worksheet; Environmental Impact Study; Open Space Narrative; and Transportation Network Narrative.
- Revised Preliminary Plat Map – submitted July 17, 2019 (to address technical corrections)

FEES DUE AT SIGNING OF THE PLAT: \$0

PLANNING COMMISSION RECOMMENDATION: At their regular meeting on August 5, 2019, the Planning Commission voted 3-2 to recommend denial of the Preliminary Plat siting concerns pertaining to safety and emergency access.

STAFF RECOMMENDATION: Staff recommends approval of the Preliminary Plat, with the following condition:

1. The Final Plat shall:
 - a. Define dedication, ownership and maintenance for:
 - Lot 1, Block 1
 - Lot 11, Block 1
 - Lot 1, Block 2
 - Lot 2, Block 2
 - b. Concurrent with the Final Plat submittal, provide a Drainage Study.
 - c. Per Section 4.3.4 of the UDC, all right-of-way width shall be a minimum 56-feet. Revise right-of-way width between Lot 10, Block 1 and Lot 8, Block 3.
 - d. Revise right-of-way at northwest corner of Lot 10, Block 1 so that it extends due west without a variation.
 - e. Revise right-of-way at northeast corner of Lot 12, Block 3 so that it extends due south to allow for possible t-intersection configuration.
 - f. Clearly show and call-out all BOPU Easements.
 - g. The vacation of the alley requires a separate vacation ordinance as the alley was originally platted as part of the Homestead Addition, First Filing Replat.

STAFF REPORT

Center Point Subdivision **Preliminary Plat Process**

CASE NUMBER(s): UDC-19-00391 **SUBDIVISION CODE:** CNPT02
PREPARED BY: Tawn Hillenbrand
PUBLIC HEARING: August 5, 2019 (Planning Commission)

OWNER(s): Floyd Lopez (307) 630-1500
6312 Big Sky Trail
Cheyenne, WY 82009

AGENT: Steil Surveying & Development Services (307) 634-7273
Casey Palma
1102 W. 19th Street
Cheyenne, WY 82001

PROJECT: Center Point Subdivision, 2nd Filing

WORK DESCRIPTIONS: A request to replat all of Lots 1-7, Block 1, Inclusive, Center Point Subdivision, City of Cheyenne, Laramie County, Wyoming (located at the southwest corner of the intersection of Homestead Avenue and Eda Place).

LOCATION:

1. Legal Description: Center Point Subdivision: Lots 1-7, Block 1, Laramie County, Wyoming
2. Location: west of the intersection of Homestead Avenue and Eda Place
3. Addresses: vacant

SIZE: 3.33 acres

ZONING: MR Medium-density Residential

EXISTING LAND USE: Vacant

PROPOSED LAND USE: Single Family detached and duplex residential lots

SURROUNDING LAND USES:

SURROUNDING	LAND USE(s)	ZONING
North	Outdoor Sales, Vacant, Outdoor Storage	LI, CB
South	Greenway	P
East	Single-family Residential	MR
West	Outdoor Recreation	LI

EXECUTIVE SUMMARY:

This plat proposes replatting one large parcel into 23 single-family residential lots, 2 drainage lots, and 2 lots dedicated to the City of Cheyenne Greenway. The land is currently undeveloped.

PlanCheyenne is supportive of residential development at this location, and the proposed plat is able to meet the intent and applicability of the MR Medium-density Residential zone district. This property, as well as properties to the east, is designated Urban Residential by the Future Land Use Map in Plan Cheyenne. The proposed residential use is considered a primary use for Urban Residential designated areas. The proposed plat would not have an undue influence on the nearby properties.

The transportation network in this area of the community is previously developed. The plat proposes to dedicate and construct approximately 600 linear feet of right-of-way as a new road to serve the proposed development. The plat also proposes to remove the existing platted cul-de-sac at the end of Homestead Avenue and proposes vacating 8-feet of the existing 24-foot wide alley adjacent to the north property boundary. The vacation of the alley may require a separate vacation ordinance as the alley was originally platted as part of the Homestead Addition, First Filing Replat (see Condition 1(g)).

Twenty-three of the 27 lots are buildable. The remaining four lots would be reserved for drainage and open space. Ownership and maintenance for the two unbuildable drainage lots (Lot 1, Block 1 and Lot 2, Block 2) and the two open space lots (Lot 11, Block 1 and Lot 1, Block 2) is unclear. Per Section 4.4.6 of the UDC, ownership and maintenance of all open space shall be clearly defined on the final plat. The plat currently notes that the lands are equally granted to the City of Cheyenne and to all owners of land contained within the replat. The lots may be granted to the City **or** to the landowners within the replat but may not be granted to both. Condition 1(a) of this plat map requires clarification of the dedication, ownership and maintenance of the four previously noted lots.

This plat shows a street section and layout that do not meet street section requirements of the UDC (Section 4.3.4). Approval of this preliminary plat does not approve the layout and design of the street, sidewalks or tree lawn within the right-of-way. Conditions 1(c-e) of this plat map require specific revisions of the right-of-way for the Final Plat in order to meet UDC standards.

With the staff recommended conditions on the Final Plat, this Preliminary Plat would meet the review criteria set forth in Section 2.1.2.d of the Cheyenne Unified Development Code, therefore staff recommends the Planning Commission recommend approval of this preliminary plat, with the following condition:

1. The Final Plat map shall:

a. Define dedication, ownership and maintenance for:

- o Lot 1, Block 1***
- o Lot 11, Block 1***
- o Lot 1, Block 2***
- o Lot 2, Block 2***

b. Concurrent with the Final Plat submittal, provide a Drainage Study.

c. Per Section 4.3.4 of the UDC, all right-of-way width shall be a minimum 56-feet. Revise right-of-way width between Lot 10, Block 1 and Lot 8, Block 3.

- d. Revise right-of-way at northwest corner of Lot 10, Block 1 so that it extends due west without a variation.***
- e. Revise right-of-way at northeast corner of Lot 12, Block 3 so that it extends due south to allow for possible t-intersection configuration.***
- f. Clearly show and call-out all BOPU Easements.***
- g. The vacation of the alley requires a separate vacation ordinance as the alley was originally platted as part of the Homestead Addition, First Filing Replat.***

Source: Planning Staff

PRELIMINARY PLAT DATA: In reviewing, providing comments, and making recommendations and decisions on a proposed preliminary plat, the Staff, Planning Commission and City Council shall use the following 8 criteria, as found in Section 2.1.2.d:

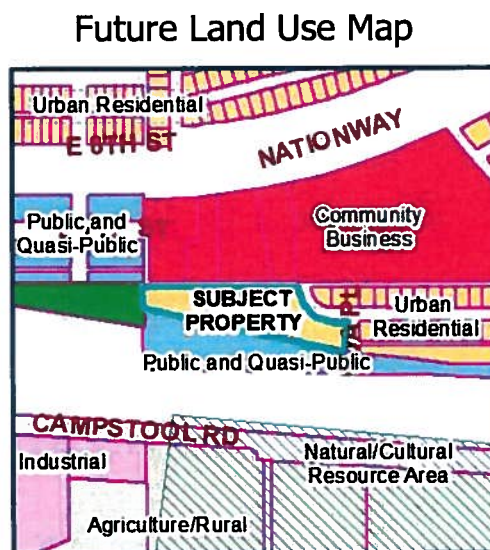

1. PLANCHEYENNE - *The application is in accordance with the development policies and physical patterns identified in PlanCheyenne.*

PlanCheyenne is supportive of this proposed preliminary plat.

PlanCheyenne policies encourage infill development within the Urban Service Boundary and the maximization of existing infrastructure. The subject property already has utilities readily available and is within the Urban Service Boundary.

PlanCheyenne encourages the enhancement and stabilization of existing residential neighborhoods and a mix of housing types in new residential developments. This proposed plat balances these two PlanCheyenne policies by maintaining a low-density development pattern but providing variation by proposing slightly smaller lots than currently exist in the neighborhood and by proposing attached housing units.

This property, and the area to the east, is designated Urban Residential by the Future Land Use Map in PlanCheyenne. The proposed residential use is considered a primary use for Urban Residential designated areas. The Urban Residential category encourages a mix of housing types. Residential areas are generally encouraged to be 6-12 dwelling units per acre for small lot single-family attached uses. The development proposed within the plat boundary contains a density of about 6½ dwelling units per acre, within PlanCheyenne's expected density range for a single-family neighborhood.

Map #4 – Zone Districts
Source: Cheyenne/Laramie County GIS Cooperative Program

2. PLANNING - *The application reflects sound planning and urban design principles with respect to existing and potential future development in the vicinity, including consideration of current and future streets, open spaces, blocks and lots, and public utilities or facilities.*

This application would create 27 total lots from previously undeveloped land in the MR Medium-density Residential zone district. Properties to the east are currently zoned MR while properties to the south are zoned P Public, properties to the west are zoned LI Light Industrial, and properties to the north are zoned LI Light Industrial and CB Community Business. The residential properties proposed with this plat would be of similar size compared to the nearby residential properties. Street rights-of-way exist to the east, and this plat proposes to construct approximately 600 linear feet of

dedicated public right-of-way to serve the 27 proposed residential lots. Utility easements are provided on the plat. This subdivision reflects sound principles considering current and future development in the area and the plat proposed would not have an undue influence on the nearby properties.

3. SUBDIVISION STANDARDS - *Division of land meets the purposes, intent, and all applicable standards in Article 4.*

Transportation Network:

The plat proposes to dedicate and construct approximately 600 linear feet of public right-of-way as well as two greenway connections. The proposed right-of-way would provide access to the proposed residential development and could serve as a connection to existing neighborhoods to the east and future developments to the north. The plat proposes to remove the existing platted cul-de-sac at the end of Homestead Avenue and proposes vacating 8-feet of the existing 24-foot wide alley adjacent to the north property boundary. The vacation of the alley may require a separate vacation ordinance as the alley was originally platted as part of the Homestead Addition, First Filing Replat (see Condition 1(g)).

The plat shows a street section and layout that do not meet street section requirements of the UDC (Section 4.3.4). Approval of this plat does not approve the layout and design of the street, sidewalks or tree lawn within the right-of-way (see Conditions 1(c-e)).

Community Facility Fees:

The land contained in this plat was previously platted as Center Point Subdivision in 2008. The plat fees required in 2008 are the same as those currently required. Plat fees previously paid may be credited toward those currently due (UDC 4.2.5.c). Assuming the original plat paid all applicable fees, the total Land Acquisition & Infrastructure Fees due at signing of the plat is \$0. This plat proposes platting the subject property for residential development. The Residential enhancement fee is \$400 per dwelling unit.

Projected Residential Enhancement Fee \$9,200 (\$400 per dwelling unit)
Per UDC Section 4.2.5, Table 4-2, Enhancement Fees are payable at the issuance of a building permit for each structure.

TOTAL FEES DUE AT SIGNING OF THE PLAT: \$0.

Open Space:

During the plat process, this property is not required to provide open space. Residential open space is not required at time of platting on infill development of less than 10 acres, as long as alternative open space options are available (UDC 4.4.3.b.3). The applicant has indicated the intent to meet the requirements of on-site open space by providing access to the existing Greenway and by dedicating two lots to the Greenway. The applicant has also indicated lands set aside as unbuildable may effectively serve as open space available to these residents, however these are noted as parcels dedicated to drainage. Drainage parcels generally do not fulfill open space requirements (UDC 4.4.3.b). This plat generally meets the open space requirements.

Required Improvements:

This division can provide all required utilities to the properties within this development. However, the Final Plat must show all BOPU easements (see Condition 1(f)).

4. PHASING - *Any phasing proposed in the application is clearly indicated and demonstrates a logical and well-planned development pattern. This may include consideration of amenities and public facilities of the subdivision within each phase compared to the anticipated timing or the likelihood of future phases being constructed as planned.*

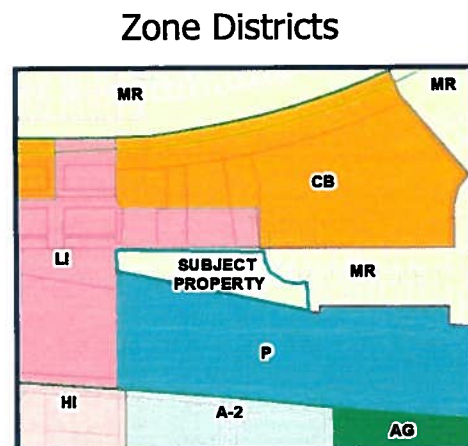

No specific phasing is proposed with this project.

5. STUDIES - *The impacts identified in specific studies or technical reports that were prepared or requested to be prepared in association with the application, and whether the findings and recommendations of these reports, or any modifications or conditions on approval of the application, can mitigate these impacts.*

The applicant submitted a Drainage Worksheet, a Traffic Worksheet, and an Environmental Impact Analysis. The Engineering Department did not find the Drainage Worksheet sufficient to address the proposed project's drainage. A Drainage Study is required with the final plat (see Condition 1(b)). The Engineering department did not identify any traffic volume issues which would require further technical reports at time of final plat.

6. ZONING - *All proposed lots shall be buildable lots according to the existing or proposed zoning district standards and result in site design and development patterns that meet the Intent and Applicability statements of the existing or proposed zoning district. All parcels not proposed as buildable lots and which are not dedicated to and accepted by the City shall have a clearly defined entity responsible for ongoing maintenance.*

This land is currently zone MR Medium-density Residential. The MR zone is intended for a mix of density and dwelling types within a neighborhood. The MR District is applicable to areas where more compact neighborhood development patterns are desired. The proposed project meets the intent of the zone district by providing adequate access to services and infrastructure.

Map #4 – Zone Districts
Source: Cheyenne/Laramie County GIS
Cooperative Program

The proposed plat contains 27 lots for a total twenty-two SD2 type (duplex) residential lots, one DD7 type (single-family detached) residential lot, 2 unbuildable lots dedicated to drainage, and two lots dedicated to City greenway. The proposed SD2 type residential lots are medium-density style development that fulfills the target density of 6-12 dwelling units per acre for the MR zone district.

The proposed single DD7 type lot is consistent with the existing low-density residential lot type development to the east.

Ownership and maintenance for the two unbuildable drainage lots (Lot 1, Block 1 and Lot 2, Block 2) and the two open space lots (Lot 11, Block 1 and Lot 1, Block 2) is unclear. Per Section 4.4.6 of the UDC, all open space shall require documentation that demonstrates the ongoing maintenance and management of the space. The plat currently notes that the lands are equally granted to the City of Cheyenne and to all owners of land contained within the replat. The lots may be granted to the City **or** to the landowners within the replat but may not be granted to both. Condition 1(a) of this plat map requires clarification of the dedication, ownership and maintenance of the four previously noted lots.

7. SURROUNDING DEVELOPMENT - *The application will not create any undue influence on existing or potential development for adjacent property considering the existing zoning and Comprehensive Plan policies for that property.*

The plat proposes replatting a previously platted parcel in an area which has varying levels of development. With the exception of one vacant parcel, properties to the north are developed with commercial uses. The properties to the east are developed with residential uses. City greenway is located directly to the south while F.E. Warren VFW Post 1881 is located directly to the west.

The subject parcel is adjacent to two existing street rights-of-way and proposes dedicating approximately 600 linear feet of new right-of-way to serve the proposed single-family residences. As rights-of-way can be used for access and utilities, the plat would not unduly influence the existing or potential development on surrounding properties.

8. PUBLIC HEALTH, SAFETY, AND WELFARE – *Whether the application will harm the public health, safety or general welfare.*

With the recommended conditions on the Final Plat, Staff is satisfied the proposed preliminary plat would not adversely affect the public health, safety, or general welfare.

REVIEW

REVIEWING AGENCIES WITH COMMENTS:

- Board of Public Utilities (Linda Gunter)
 - o **(Condition 1(f))** Clearly show and call-out the BOPU's Easement.
- Development (Tawn Hillenbrand)
 - o **(FYI)** Proposed lots qualify as SD2 (UDC 5.1.5.b). SD2 lots are allowed in the MR zone district. MR zone must meet the design standards of Section 6.6.3.
 - o **(Condition 1(a))** Open space and drainage lot dedication, ownership, and maintenance is not clear, per notes 5 and 6 on the Preliminary Plat Map. Clarification of ownership and maintenance of open space is required per Section 4.4.6 of the UDC.

- **(Condition 1(g))** The vacation of the alley may require a separate vacation ordinance as the alley was originally platted as part of the Homestead Addition, First Filing Replat.
- Engineering Department – Drainage (Mike Vinson)
 - **(Condition 1(b))** A Drainage Impact Study will be required demonstrating City criteria will be met.
- Engineering Department – GIS (Gary Stogsdill)
 - **(Fulfilled by revised map)** Need block number.
 - **(Fulfilled by revised map)** Missing labels for lot 11 & lot 16.
- Engineering Department – Traffic (Anissa Gerard)
 - **(FYI)** Approval of this plat does NOT approve the layout and design of the street, sidewalk, etc. within the right of way.
 - **(FYI)** Lots 4-7, Block 1 driveway/access configuration will not be approved if the current non-conventional intersection shown is proposed.
 - **(Condition 1(c))** The Right of way shown by Lot 10, Block 1 and Lot 8, Block 3 is only 55' and should be 56' minimum per UDC.
 - **(FYI)** The centerline of the street should be the middle of the right of way.
 - **(Condition 1(d))** The right of way shown at NW corner of Lot 10, Block 1 should extend due west (no variation).
 - **(Condition 1(e))** At the NE corner of Lot 12, Block 3 the Right of way line should extend due south to allow for possible t-intersection configurations.
- Forestry (Mark Ellison)
 - **(FYI)** The proposed Plat does not show detached sidewalks. The UDC, chapter 4.3 requires a detached sidewalk with a 7 ft. tree lawn between the sidewalk and the curb for residential streets. Detached sidewalks with street trees improve quality of life for residents, increases property values and reduces maintenance for sidewalks and streets.
- Laramie County Assessor (Clarice Blanton)
 - **(Fulfilled by revised map)** Lots 11 and 16 are not labeled.
 - **(Fulfilled by revised map)** On the Transportation Worksheet, Appendix C only 23 lots are indicated. What category do the remaining four lots fall into?
- Laramie County Clerk (Laura Pate)
 - **(Fulfilled by revised map)** Missing Lot 11 and 16.
- Laramie County Dispatch (Chuck Trimble)
 - **(Fulfilled by revised map)** The proposed "Homestead Court" is too similar to the existing Homestead Ave. In addition, the orientation of the proposed street gives the appearance that it is an extension of the existing thoroughfare and could potentially create confusion for the public and first responders alike.

Consideration should be given to naming the new street as uniquely as possible.

- Laramie County School District #1 (Chris Hout)
 - **(FYI)** This development site falls within the South Triad -- student's home attendance boundaries are South High School, Johnson Junior High School and Fairview/Lebhart Elementary Schools.

The current attendance for these schools is as follows:

- Fairview/Lebhart -- slightly below capacity, some space available most grades.

- Johnson Junior High -- below capacity with space available in both grades.
- South High -- below capacity, space available all grades.
- Metropolitan Planning Organization (Tom Cobb)
 - o **(FYI)** It appears the intersection of the existing Homestead Avenue with the proposed Homestead Court could be problematic for pedestrians and vehicle interaction, as well as, resident driveways. This is due to skew of the intersections. Therefore, could the intersection be aligned to accommodate a more perpendicular intersection of the two streets using a curve?
- Urban Planning (Tawn Hillenbrand)
 - o **(FYI)** PlanCheyenne encourages infill development and the maximization of existing infrastructure; the enhancement and stabilization of existing residential neighborhoods; and a mix of housing types in new residential developments.
 - o **(FYI)** The area is designated Urban Residential by the Future Land Use Map. This area is within the Urban Service Boundary.
 - o **(FYI)** PlanCheyenne encourages 6-12 dwelling units per acre for single-family attached uses in Urban Residential designated areas.
- Urban Planning (Richard Zita)
 - o **(FYI)** Intersection at Homestead needs to be closer to ninety degrees to provide safety access and egress. Verify with traffic and civil engineering.
 - o **(FYI)** Access/egress to lots 4,5 and 6 are too close to the intersection. Verify with traffic and engineering.
 - o **(FYI)** Would prefer to see tree lawn dedicated throughout to insure a more consistent and effective street tree planting.

All other reviewing agencies did not provide comments.
