

Replacement of Fire Station #5

Fire Station #5 is in North Cheyenne and services the Dell Range Blvd commercial corridor. The Fire Station is 56 years old (constructed in 1963) and has numerous problems, as it is no longer able to adequately serve Cheyenne's citizens. Problems from sheer age and wear have found this station unfit for continued service.

There has been expansive growth in North Cheyenne since the existing fire station was built. Commercial occupancies and residential growth have exploded in the past 56 years, rendering the existing station inadequate to ensure proper coverage to both commercial and residential areas. Given the poor condition of Fire Station #5, Cheyenne's Fire Chief, Greg Hoggatt, noted "the only repairs that should be authorized are those that keep the station operational until the new station can be built."

The 56-year-old Fire Station was not built to accommodate the numerous advances in firefighting, equipment and technology that now exist. A new station, to replace Station #5, will provide for the care of firefighters, vehicles, and equipment. It will be built to provide all that is needed for firefighting in 2020 and for many, many years to come.

A new station will provide firefighters with a station where the vehicles and equipment will be properly stored and cared for within a temperature-controlled space. The existing station is not well insulated, and the bays freeze, allowing the water pumps to freeze, which then makes them unavailable for use. Temperature-controlled bays will keep the water pumps from freezing, allowing for a fully functioning fire truck, ready to respond at a moment's notice. The poor and antiquated Station #5 HVAC system also has a negative effect on the firefighters who staff the station. The reliability that a new station will afford firefighters, as well as the equipment and vehicles, will benefit the public by the resulting faster response time and increased dependability.

A new Fire Station #5 will resolve the many issues with the existing station and will make firefighting from Station #5 more efficient and reliable. If Fire Station #5 is not replaced, we are nearing the point where the station will need to be abandon. At this point, this station can no longer service the citizens of Cheyenne well.

In 2017, Cheyenne Fire and Rescue Chief, Greg Hoggatt, directed his staff to do a thorough examination of the condition of each fire station and to submit a report to him. The chief condensed the report and added his conclusions and recommendation into an executive summary in October 2017, identifying Station #3 and #5 as needing replaced. He prioritized Station #5 as the most urgent of the two stating, "Begin the process to replace the station that will meet the needs of the department in the future."

RESOLUTION _____

ENTITLED: “A RESOLUTION AUTHORIZING SUBMISSION OF A MINERAL ROYALTY CAPITAL CONSTRUCTION ACCOUNT GRANT APPLICATION TO THE STATE LOAN AND INVESTMENT BOARD ON BEHALF OF THE GOVERNING BODY OF THE CITY OF CHEYENNE FOR THE PURPOSE OF REPLACING FIRE STATION #5.”

WHEREAS, the Governing Body of the City of Cheyenne (“City”) desires to participate in the Mineral Royalty Capital Construction Account Grant program to assist in financing the building of a new Fire Station #5; and

WHEREAS, the City recognizes the need for a new fire station as a replacement for the existing antiquated Fire Station #5; and

WHEREAS, the Mineral Royalty Capital Construction Account Grant program requires that certain criteria be met as described in the State Loan and Investment Board’s Rules governing the program and, to the best of the City’s knowledge, this application meets those criteria; and

WHEREAS, grant funding for this Project will be considered by the State Loan and Investment Board at its meeting on January 16, 2020; and

WHEREAS, if grant funding is awarded for this project, the Mayor is authorized to sign the grant agreement with the State of Wyoming; and

WHEREAS, the total estimated Project cost is Four Million, Eight Hundred and Sixty-Four Thousand, Seven Hundred and Ten Dollars (\$4,864,710.00) and the City will request a grant of half of this amount, or Two Million, Four Hundred and Thirty-Two Thousand, Three Hundred and Fifty-Five Dollars (\$2,432,355.00). The City plans to match the requested Mineral Royalty Capital Construction Account Grant with Two Million, Four Hundred and Thirty-Two Thousand, Three Hundred and Fifty-Five Dollars (\$2,432,355.00) from the 5th and 6th Penny Sales Tax Accounts.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, that the City is authorized to submit a Mineral Royalty Capital Construction Account Grant application for Two Million, Four Hundred and Thirty-Two Thousand, Three Hundred and Fifty-Five Dollars (\$2,432,355.00) to the State Loan and Investment Board for consideration at the January 16, 2020 State Loan and Investment Board meeting to assist in funding the building of a new Fire Station #5.

BE IT FURTHER RESOLVED, that the Mayor of the City of Cheyenne, is hereby designated as the authorized representative of the City to act on behalf of the Governing Body on all matters relating to this grant application.

PRESENTED, READ, AND ADOPTED THIS _____ DAY OF SEPTEMBER, 2019.

Marian J. Orr, Mayor

(SEAL)
Attest:

Kristina F. Jones, City Clerk
