

RESOLUTION NO. _____

ENTITLED: "A RESOLUTION AUTHORIZING THE MAYOR AND THE CITY CLERK TO SIGN A FINAL PLAT FOR HAWK'S POINT SUBDIVISION, A PLAT OF A PORTION OF THE SE¼ SECTION 33, T.14N., R.66W., 6TH P.M., CHEYENNE, LARAMIE COUNTY, WYOMING (LOCATED BETWEEN LINCOLNWAY AND NATIONWAY, WEST OF RIDGE ROAD)."

WHEREAS, Section 20, LLC, has subdivided said land in accordance with the statutes in such cases made and provided; and

WHEREAS, Section 20, LLC, the owner of the above described land, has caused a subdivision plat of said land to be made, acknowledged, and certified, particularly describing the lots, block, easements, and right-of-way; and

WHEREAS, the above described subdivision plat has been presented to the City of Cheyenne Planning Commission for consideration; the Planning Commission has recommended that said plat be approved by the governing body; and the plat has been duly executed by the Development Office; and

NOW, THEREFORE BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, THAT the subdivision described as Hawk's Point Subdivision, Cheyenne, Wyoming, be and the same hereby is approved and confirmed as presented, and that the Mayor and the City Clerk be and are hereby authorized, empowered, and directed to execute said plat, when Community Facility Fees have been paid in full.

PRESENTED, READ AND ADOPTED THIS _____ DAY OF _____, 2020.

MARIAN J. ORR, MAYOR

(SEAL)
ATTEST:

KRISTINA F. JONES, CITY CLERK

STAFF REPORT - SUMMATION

Hawk's Point Expedited Preliminary Plat

CASE NUMBER(s): UDC-20-00162

SUBDIVISION CODE: HWKP 01

PREPARED BY: Seth Lloyd

MEETING DATES:

Planning Commission:	July 6, 2020
City Council:	July 13, 2020
Public Service Committee:	July 21, 2020
City Council:	July 27, 2020

REQUIRED DOCUMENTS SUBMISSION: The following documents have been submitted and reviewed by Staff:

- Master Application; Preliminary Plat Map; Final Plat Map; Preliminary Drainage Report; Transportation Impact Study; Open Space Narrative, Transportation Network Plan, and Request for Waiver from Environmental Impact Assessment
- Response to Comments Letter; Revised Preliminary Plat Map; Revised Final Plat Map; Revised Preliminary Drainage Report – submitted June 15, 2020 (submitted in response to Staff comments)
- Revised Response to Comments Letter; Revised Transportation Impact Study – submitted June 18, 2020 (submitted in response to Staff Comments)

FEES DUE AT SIGNING OF THE PLAT: \$1,960.00

PLANNING COMMISSION RECOMMENDATION: At their regular meeting on July 6, 2020, the Planning Commission recommended approval of an exception to the block size requirement of UDC 4.3.3.a, and approval of the expedited Preliminary Plat, advancing the Final Plat to the Governing Body, by a vote of 3-0, with the condition that a revised final plat map addressing the following conditions be submitted prior to Council approval:

- Revise the final plat to show widen of the internal access easement to a width to accommodate a street section to the satisfaction of the City Traffic Engineer.
- Align the internal access easement to connect to the intersection of Mulberry and Nationway.
- Prior to City signing of final plats, utility drawings demonstrating compliance with Board of Public Utility construction and looping standard shall be reviewed and approved by the Board of Public Utilities.

(Staff met with the applicant after the Planning Commission mailing and before the Planning Commission meeting. At this meeting it was determined by Staff that it was not essential to address the condition regarding drainage at this time [Condition #3 below]. The Planning Commission subsequently did not include that condition in their recommendation.)

STAFF RECOMMENDATION (6/29/2020): Staff recommends approval of the Preliminary Plat and the exception to block size requirement of UDC 4.3.3.a, with the following conditions:

1. Revise the final plat to show widen of the internal access easement to a width to accommodate a street section to the satisfaction of the City Traffic Engineer.
2. Align the internal access easement to connect to the intersection of Mulberry and Nationway.
3. Prior to Governing Body consideration of the expedited final plat, a drainage study shall be submitted to the City and said study shall be reviewed and approved by the City Engineer.
4. Prior to City signing of final plats, utility drawings demonstrating compliance with Board of Public Utility construction and looping standard shall be reviewed and approved by the Board of Public Utilities.

STAFF REPORT

Hawk's Point **Expedited Preliminary Plat**

CASE NUMBER(s): UDC-20-00056 **SUBDIVISION CODE:** HWKP 01
PREPARED BY: Seth Lloyd
PUBLIC HEARING: July 6, 2019 (Planning Commission)

OWNER: Section 20, LLC (307) 634-4577
2220 Del Range Blvd, Suite 100 fmc999@aol.com
Cheyenne, WY 82009

AGENT: Daniel J. Hayes, P.E. (307) 635-6827
350 Parsley Blvd. dhayes@inberg-miller.com
Cheyenne, WY 82009

PROJECT: Hawk's Point Preliminary and Final Plat (expedited plat)

WORK DESCRIPTIONS: A request to plat a portion of the SE¼, Section 33, T14N, R66W, 6th PM, Cheyenne, Laramie County, Wyoming (located south of and adjacent to Sparks Road, west of Ridge Road).

LOCATION:

1. Legal Description: A portion of the SE¼, Section 33, T14N, R66W, 6th PM, Cheyenne, Laramie County, Wyoming
2. Location: South of and adjacent to Sparks Road, west of Ridge Road
3. Address: <unaddressed>

SIZE: 9.6 acres

CURRENT ZONING: CB Community Business
PROPOSED ZONING: MUB Mixed-Use Business Emphasis
EXISTING LAND USE: Vacant
PROPOSED LAND USE: Multifamily (Senior Housing), other future development

SURROUNDING LAND USES:

SURROUNDING	LAND USE(s)	ZONING	ANNEXATION STATUS
North	Residential, Assembly, Outdoor Sales	LR, PUD, CB	City
South	Residential, Assembly	NB, P, MR	City
East	Lodging, Retail	CB	City
West	Office, Medical Office	CB	City

EXPEDITED REVIEW:

This plat is being pursued as an expedited application. An expedited review process is a concurrent preliminary and final plat. A project may be eligible for an expedited review when the proposal contains no significant planning, design or engineering issues. In other words, proposals that meet all applicable regulations and generally meet the review criteria for preliminary and final plat may be eligible for the concurrent preliminary and final plat process.

Due to meeting the expedited plat criteria set forth in Section 2.1.2.c(3) of the Cheyenne Unified Development Code, this plat has proceeded as an expedited application.

EXECUTIVE SUMMARY:

This plat proposes platting nearly 10 acres of previously unplatted land into 2 lots. The subject property has concurrently applied for a zone change to MUB Mixed-use Business Emphasis. The specific development proposed with the plat is a multifamily (senior housing) facility on about 2.8 acres. The remaining acreage is reserved for unknown future development, but could become residential, commercial, or a mix of uses under the proposed MUB zone.

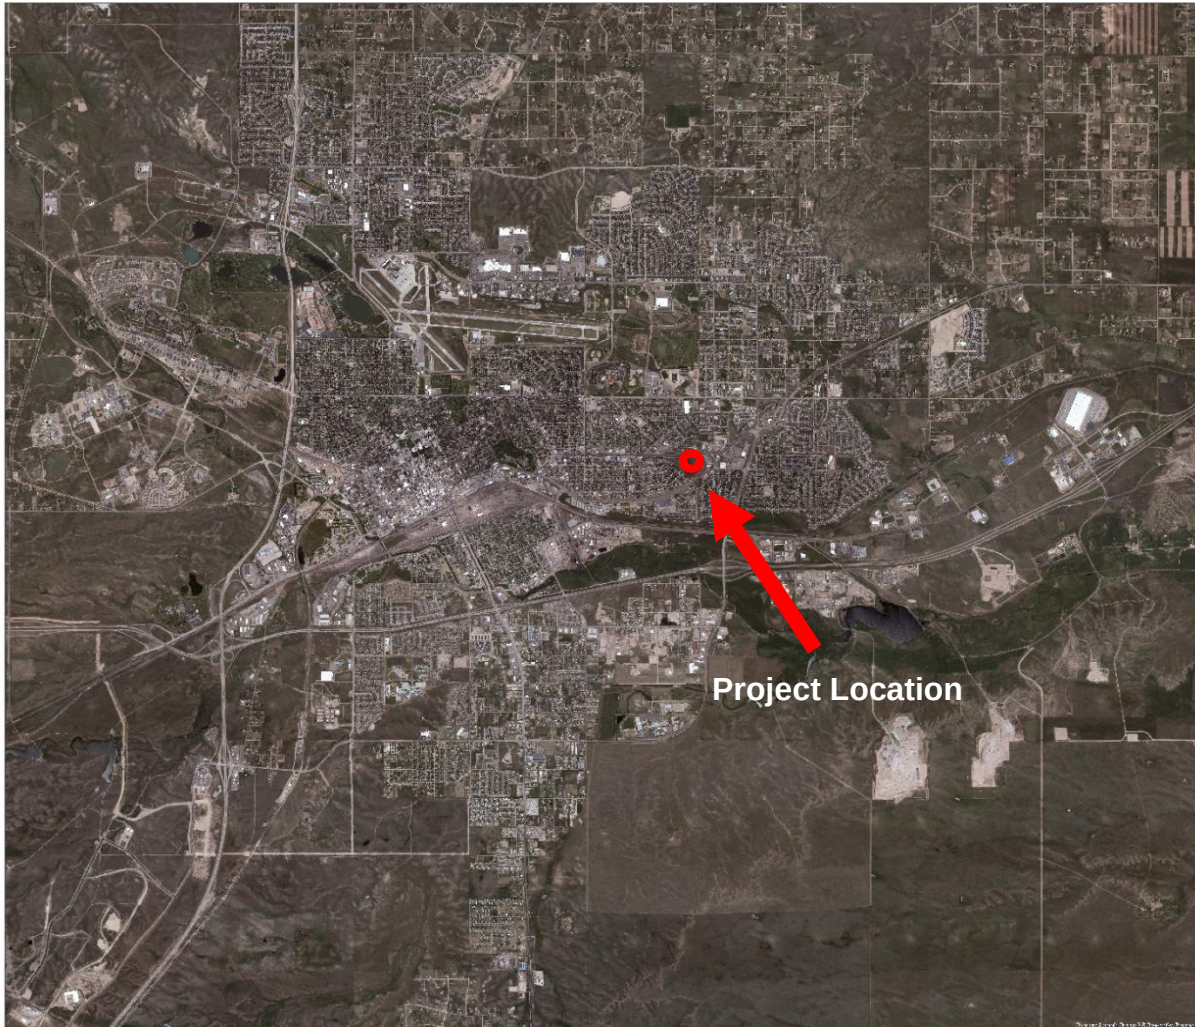

PlanCheyenne is supportive of this plat. The comprehensive plan encourages infill development which maximizes the use of existing infrastructure. The plat also contributes a potential mix of new commercial and residential uses to an activity center.

Surrounding properties are largely already developed with commercial and residential uses. There is limited opportunity for this plat to tie into the properties to the west and east, but this plat can provide a north-south connection linking Lincolnway and Nationway for vehicles and pedestrians. The proposed plat would not have an undue influence on surrounding development.

The applicant has provided an access easement to connect Lincolnway and Nationway, but the location and width of the access easement still may need modification to provide an effective connection. The drainage area and discharge proposed by this development is along Henderson Ditch, and further information is required to determine if the proposed drainage mitigation measures would be effective. Utilities need to be extended to service this development, and the applicant has indicated the intent to do so, but final alignments and extensions need clarification.

Due to meeting the review criteria set forth in Section 2.1.2.d and 2.1.3.d, staff recommends the approval of the Preliminary Plat.

Photograph #2 – Image of the subject property from the intersection of Nationway and Mulberry Avenue, facing north
Source: Development Office

PRELIMINARY PLAT DATA: In reviewing, providing comments, and making recommendations and decisions on a proposed preliminary plat, the Staff, Planning Commission and City Council shall use the following 8 criteria, as found in Section 2.1.2.d:

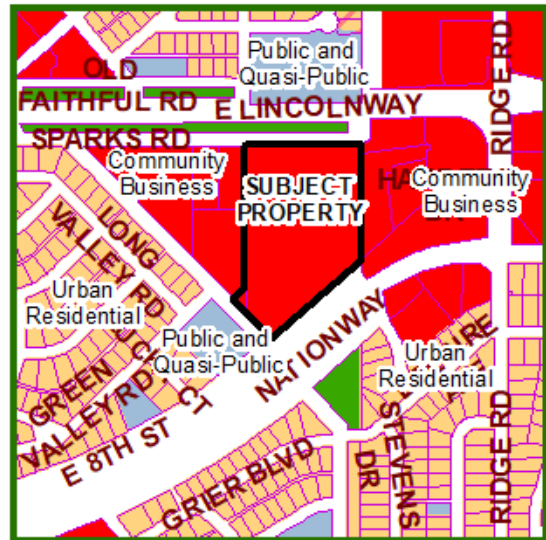

1. PLANCHEYENNE - *The application is in accordance with the development policies and physical patterns identified in PlanCheyenne.*

PlanCheyenne is supportive of this proposed plat.

Multiple policies and principles within PlanCheyenne encourage infill development which maximizes the use of existing infrastructure. While the subject property will have to extend utilities to effectively service development, extensions are relatively minor, and all utilities exist in the area. The subject property is surrounded by previous development.

The development of the subject property for multi-family senior housing furthers the objective of Principle 2.6 in PlanCheyenne, which states, "Our community will contain housing for senior citizens and other populations with special needs, truly making it a place for all generations."

The property is currently subject to a recently-adopted future land use map amendment re-designating the area as "Mixed-Use Commercial Emphasis," which will support the proposed zone change for the property, the proposed residential development on Lot 1, and a mix of uses with future development on the proposed vacant lot.

Map #3 - Future Land Use
Source: Cheyenne/Laramie County GIS
Cooperative Program

2. PLANNING - *The application reflects sound planning and urban design principles with respect to existing and potential future development in the vicinity, including consideration of current and future streets, open spaces, blocks and lots, and public utilities or facilities.*

This plat proposes creating 2 lots on previously unplatted land. The first lot is proposed for immediate development as a senior housing multifamily development. The second lot has no immediate plans for future development and is intended to be replatted at a later date when development plans are more specific. The location of utilities, access, and drainage features on the second lot used to service the first may create constraints to future development; however any development of Lot 2 would be aware of the location of these constraints and should be able to work within them. Because Lot 2 would be required to be replatted, modification of some of these facilities may be possible when Lot 2 develops. Properties surrounding this development are largely already developed or platted and this plat would not create any undue influence on potential development or redevelopment of these surrounding areas.

3. SUBDIVISION STANDARDS - *Division of land meets the purposes, intent, and all applicable standards in Article 4.*

Transportation Network:

The block on which this property is located is larger than allowed by current block allowances. Surrounding development patterns provide little opportunity for connections. However, this property is adjacent to both Lincolnway and Nationway. The division of the property would allow a local connection between these two streets. The block standards of the Unified Development Code suggest a public street would be optimal, but large commercial development sites may propose access easements instead of full public streets as an alternate option. The applicant has proposed a 30' wide access easement linking north-south, but the location and width of the access easement is deficient.

Community Facility Fees:

The proposed plat contains previously unplatted land. Plat fees are required at \$350 per acre for the Land Acquisition Fee, \$350 per acre for the Infrastructure Fee, and the Residential Enhancement Fee is \$400 per unit (due at time of Building Permit). Lands platted for governmental use, public utilities, or as undevelopable are exempt, as is any land dedicated for public rights-of-way. For fees based on acreage, the area of the plat is pro-rated to the nearest tenth of an acre. The required fees for the 2.8 acres of non-exempt land in this plat are as follows:

Land Acquisition Fee	\$980 (\$350 per acre)
Infrastructure Fee	\$980 (\$350 per acre)

Total Land Acquisition & Infrastructure Fees: \$1,960.00

Per UDC Section 4.2.5, Table 4-2, the Land Acquisition & Infrastructure fee are payable at the time of the signing of the final plat.

Projected Residential Enhancement Fee	\$22,400 (56 units at \$400 per unit)
---------------------------------------	---------------------------------------

Per UDC Section 4.2.5, Table 4-2, Enhancement Fees are payable at the issuance of a building permit for each structure.

Total Fees due at signing of the plat: \$1,960.00

Open Space:

During the plat process, this property is not required to provide open space. The applicant has indicated site-specific open space would be provided with site development.

Required Improvements:

This division can provide all required utilities to the properties within this development. Easements are provided for water and sewer connections to service the lots within the proposed plat area.

4. PHASING - Any phasing proposed in the application is clearly indicated and demonstrates a logical and well-planned development pattern. This may include consideration of amenities and public facilities of the subdivision within each phase compared to the anticipated timing or the likelihood of future phases being constructed as planned.

Lot 1 is proposed to be developed and Lot 2 is proposed as an outlot. An outlot is undevelopable until subsequent platting action. Lot 1 requires access to utility services and the existing utilities are on the far ends of the plat boundary. Development of Lot 1 would 'front load' these utilities, making the the future of the development of Lot 2 more likely. However, placing utilities for Lot 1 may also provide some constraints to the development of Lot 2.

5. STUDIES - The impacts identified in specific studies or technical reports that were prepared or requested to be prepared in association with the application, and whether the findings and recommendations of these reports, or any modifications or conditions on approval of the application, can mitigate these impacts.

The applicant submitted studies addressing drainage and traffic. Redivisions to these studies were also provided after the first round of Staff review comments. The drainage needs further evaluation with respect to how this development would impact Henderson ditch. No further studies were requested with this application and no other concerns were identified by Staff.

6. ZONING - All proposed lots shall be buildable lots according to the existing or proposed zoning district standards, and result in site design and development patterns that meet the Intent and Applicability statements of the existing or proposed zoning district. All parcels not proposed as buildable lots and which are not dedicated to and accepted by the City shall have a clearly defined entity responsible for ongoing maintenance.

The area contained within this plat is currently zoned CB Community Business, but is going through the process to be changed to MUB Mixed-use Business Emphasis. The buildable lot proposed by this development is appropriately sized for development in either zone district.

The applicant is proposing leaving the remaining area as an outlot, as no specific future development is proposed. Outlots are unbuildable lots, but are slated for future development.

Map #4 – Current Zoning
Source: Cheyenne/Laramie County GIS
Cooperative Program

The MUB zone is intended for a mix of uses in a compact development pattern and is intended to be a central component of activity centers. This property is located near the intersection of Ridge, Lincolnway, and Nationway and in an area with a diverse mix of commercial and residential development. Due to the nature of existing surrounding development, there is limited opportunity for this property to provide the compact block network intended by the MUB zone. The plat does have the opportunity to better meet the intent of the zone district by providing a public street or accessway connecting Lincolnway and Nationway.

7. SURROUNDING DEVELOPMENT - *The application will not create any undue influence on existing or potential development for adjacent property considering the existing zoning and Comprehensive Plan policies for that property.*

Property surrounding this proposed plat is largely already developed. To the west, east and northeast, properties are already developed with commercial uses. To the south and north, nearby development is largely residential in nature, but these residential areas are separated from the proposed plat area by large streets and the drainage ditch. The large lots proposed by this plat are similar to some of the commercial lots in the area. The proposed plat would not have an undue influence on surrounding properties.

8. PUBLIC HEALTH, SAFETY, AND WELFARE – *Whether the application will harm the public health, safety or general welfare.*

The proposed plat requires alignment of the accessway, a drainage study, and appropriate utility provision. As these issues are resolved, Staff is satisfied the proposed plat would not otherwise adversely affect the public health, safety, or general welfare.

REVIEW

The following agencies were asked to review the proposed project: 911/Combined Communications, Black Hills Energy, Board of Public Utilities (BOPU), Building Department, CenturyLink, Charter, Community Recreation and Events, Emergency Management, Engineering, Environmental Health Department, Fire Department, Laramie County Assessor, Laramie County Attorney, Laramie County Clerk, Laramie County School District #1, Metropolitan Planning Office, and Planning and Development.

COMMENTS FROM REVIEWING AGENCIES ON THE FIRST SUBMITTAL:

- **(Fulfilled by revised submittal)** It appears Lot 2 is generically slated for 'future development' suggesting a phasing plan with Lot 2 as an outlot - not eligible for development until replatted. If this is the case, Lot 2 should be clearly identified as an outlot on the face of the plat. If designated as an outlot, future platting of Lot 2 would require council approval.
- **(Fulfilled by revised submittal)** Provide a statement to the nature of detention pond maintenance. Private detention ponds are to be maintained by the developer and property owner.
- **(FYI)** Park Fees will be required. They will be provided upon final calculation by staff.
- **(Condition)** Per the *BOPU's Infrastructure Policies & Design Criteria, UTILITY EXTENSIONS AND CONNECTIONS III.A.1. Extensions Required Across the Property*: as per sections 1.16.040, 1.16.050 and 1.16.060 of Chapter 1.16 of the CMC, the property owner/developer shall be

required to extend the water and sanitary sewer utilities to the farthest point (or points) of the property being developed. These utility extensions shall be to a point (or points) that are logical for projected future connections by future development projects, as determined by the BOPU and the property owner/developer.

- **(Condition)** *WATER DESIGN CRITERIA VII.F. Dead End Mains:* BOPU does not allow dead end water mains over 250 feet in the system. It is most likely that the water main needs to be a looped system. Please show all proposed water / sewer mains, service connections on this Preliminary Plat.
- **(Fulfilled by revised submittal)** Property owner shall provide BOPU Easements for water and sanitary sewer utilities that are not located or constructed within the roadway or Public Right of Way. The easement width shall be for no less than 20 feet for one utility main located in the center of the easement and shall be no less than 30 feet wide when two utility lines are constructed in parallel and are centered within the easement.
- **(Fulfilled by revised submittal)** The following note shall appear on all applicable construction drawings, plat maps, easement documents, etc.: "This WATER AND SEWER UTILITY EASEMENT (hereinafter referred to as the "BOPU UTILITY EASEMENT"), as shown and described hereon, is granted to the Board of Public Utilities of the City of Cheyenne ("BOPU"). No other utilities may install facilities on or within the BOPU UTILITY EASEMENT, except as follows: Other utilities may cross the BOPU UTILITY EASEMENT, if and only if: (i) a utility's facilities cross the BOPU facilities at no less than a 60 degree angle; (ii) a minimum of 24 inches of vertical clearance is provided between the BOPU facilities and the crossing facilities, unless otherwise approved by the BOPU; and (iii) a copy of any utility easement authorizing the crossing of the BOPU UTILITY EASEMENT is provided to the BOPU prior to any construction within the BOPU UTILITY EASEMENT."
- **(Fulfilled by revised submittal)** Please provide an easement to cover the proposed stormwater detention pond.
- **(Fulfilled by revised submittal)** Drainage Report Section 2.2 -- States a copy of a firmette map can be found in Appendix A. This map does not appear to be included. Please revise or justify.
- **(Fulfilled by revised submittal)** Drainage Report Section 3.3 -- The Time of Concentration (Tc) is stated as 18 minutes for the pre-development 2.9 acres. Appendix C calculations appear to be based on this 18-minute Tc. Appendix D shows this to be 18.95 minutes. Please revise or justify.
- **(Fulfilled by revised submittal)** In the drainage report, the pond is sized for Lot 1. The detention pond would need to be expanded when Lot 2 is developed.
- **(Condition – partially fulfilled by revised submittal)** The current block exceeds allowances of UDC 4.3.3.a – the access easement should connect to Nationway through this site (see UDC 6.2.3.b). The Transportation Network Plan indicates intention for an accessway to connect through the site. Please extend the access easement.
- **(Fulfilled by revised submittal)** Please provide updates to the traffic study and/or call Anissa Gerard (307-637-6264) to discuss updates so that what is provided is approved. Issues identified with the traffic study:
 - o Traffic Impact Study should be stamped by a Wyoming P.E.
 - o No seasonal adjustment was made to the April traffic counts. A review of the WYDOT permanent counter site just east of Cheyenne on US 30 shows a 1.17 seasonal factor when compared to the AADT at that site.
 - o It appears the 2020 April counts are low when compared to the 2016 April counts. A comparison of the mainline Lincolnway traffic is approximately 72% of the 2016 values at Henderson/Sparks and 80% of the 2016 values at Sparks. For the unsignalized

intersection volume counts, did you adjust traffic volume numbers in order to account for reductions due to COVID-19? This will affect the 2045 numbers. These should be adjusted by increasing the existing counts by 25% (multiplying by 1.25) to get to the "normal" traffic volumes. This is based on our other areas of real data in the city.

- Synchro analysis is using an ideal flow rate of 1900 vphpl. Wyoming driving characteristics would place the flow rate more in the range of 1600 vphpl. Please change the default in all Synchro analyses for ideal flow to 1600 from 1900.
- The trip generation is not clear and doesn't add up to match in Synchro. On page 1 the values for AM peak are way different than page 2 in the appendix. Please call Anissa Gerard to explain the differences and how these were distributed.
- Does the queue length from Synchro match the 75 foot recommended queue length on page 18?
- A level of Service E on a lane movement is unacceptable even in 2045. This may change with the existing counts being increased. Please recommend solutions to get this to a LOS D. A turn lane? Additional control?
- **(FYI)** Without plat-level open space, individual lots will be required to provide open space. If Lot 2 is replatted into a single-family residential subdivision, open space will be required with the replatting action.
- **(FYI)** Future Greater Cheyenne Greenway plans show this site as a connection point to the existing Greenway to the south that runs along Henderson ditch and ultimately to GW that runs E and W north of Campstool Road. The intent would be to build an underpass at Nationway (or at grade crossing) to provide access for the neighborhood west of this site and might prove to be a valuable asset to residents of the proposed multi-family senior housing complex described in the narrative. Jeanie Vetter (307-638-4379), Greenway Planner, would like an opportunity to discuss options for this with the Developer and/or Consultants. Community Facility Fees are applicable to this subdivision.
- **(FYI)** The development of the subject property for multi-family senior housing furthers the objective of Principle 2.6 in PlanCheyenne, which states, "Our community will contain housing for senior citizens and other populations with special needs, truly making it a place for all generations."
- **(FYI)** The property is currently subject to a future land use map amendment re-designating the area as "Mixed-Use Commercial Emphasis," which will support the zone change for the property and future mixed-use development on the proposed vacant lot.
- **(FYI)** Lots are buildable in both current and proposed zones. Lot 1 is proposed to be MD1, Lot 2 would be MUB or MD1 lot type depending on development proposal.
- **(Fulfilled by revised submittal)** Add a block number.
- **(Fulfilled by revised submittal)** Approvals block on Final Plat Map needs to be modified: approvals are by the City of Cheyenne Planning Commission (signed by the Planning and Development Director) and the City Council or Governing Body (signed by the Mayor); and Kris Jones is the City Clerk.
- **(Fulfilled by revised submittal)** Outside boundary should be more prominent.

COMMENTS FROM REVIEWING AGENCIES ON THE SECOND SUBMITTAL:

- **(Condition)** Water line on originally-submitted Preliminary Plat was located in Sparks Road. The resubmitted Preliminary Plat shows a water line crossing Lot 2 about 300' south of Sparks Road, but no longer shows a water line in Sparks Road, therefore it appears no water line loop is provided.

- **(Condition)** The access to Nationway must align Mulberry street to make a 4 way intersection. The access street width should be 40' to accommodate a "local" roadway street section and necessary parking.
- **(FYI)** WYDOT does not have a mechanism for collecting assessment fees for future improvements such as traffic signal installation. If the City has such a mechanism, WYDOT would support such assessment fees for the developer's mitigation of associated proportional impacts.
- **(FYI)** Traffic signal should not be installed until MUTCD warrants for signalization are met.
- **(FYI)** Addition of designated left turn lanes at either end of Sparks Rd could be implemented with this development. The eastern intersection with Lincolnway appears to have existing width that would accommodate a short turn lane by applying striping. The western intersection at Henderson/Lincolnway would benefit from some widening on the east side of Sparks to help square up traffic with Lincolnway and accommodated striping.
- **(Condition)** A final drainage report is required in compliance with Ordinance No. 4087 (approved 8/26/2015). The proposed detention pond must release stormwater at the pre-developed rate for the 2- through 50-year storm events capping the release at the 50-year pre-developed rate. An outfall depth/discharge rating curve is required showing that the outlet structure is in full compliance for storm events ranging from the 2- through 100-year events. Because the outfall is directed to the Henderson ditch, an evaluation of lag time for the ditch and on-site drainage should be conducted to show that flow from the developed site doesn't increase peak flow in the ditch. Evaluation of downstream conveyance may be required as well.
