

RESOLUTION NO. _____

ENTITLED: “A RESOLUTION AUTHORIZING THE CITY OF CHEYENNE COMMUNITY RECREATION AND EVENTS DEPARTMENT TO APPLY FOR A CHEYENNE COMMUNITY RECREATION DISTRICT RECREATION MILL GRANT TO PURCHASE SCOREBOARDS AND SOUND SYSTEMS FOR THE CHEYENNE JUNIOR LEAGUE ATHLETIC COMPLEX.”

WHEREAS, the Cheyenne Community Recreation District receives funds from the recreation mill levy pursuant to Wyo. Stat. § 18-9-201(b); and

WHEREAS, up to 15% of the funds are available competitively to governmental recreation organizations for public recreation projects; and

WHEREAS, the City of Cheyenne Community Recreation and Events Department is applying for a grant in the amount of \$100,000.00 from the Cheyenne Community Recreation District Board of Trustees to purchase scoreboards and sound systems for the Cheyenne Junior League Athletic Complex; and

WHEREAS, if funded, the bidding process will begin immediately so that the purchase can be made and installation will be completed during the Fall 2021 season.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, that the Governing Body supports this project and authorizes the City of Cheyenne Community Recreation and Events Department to apply for grant funding in the amount of \$100,000.00 through the Cheyenne Community Recreation District Recreation Mill Grant program for Fiscal Year 2021 – Fiscal Year 2022 to purchase scoreboards and sound systems for the Cheyenne Junior League Athletic Complex.

BE IT FURTHER RESOLVED that the Mayor and City Clerk are authorized to execute all documents, including a grant agreement, to secure funding under the Cheyenne Community Recreation District to the extent that such documents are consistent with this Resolution.

PRESENTED, READ, AND ADOPTED this _____ day of _____, 2021.

Cheyenne Community Public Recreation District Board:

We are pleased to submit this grant application to purchase scoreboards and sound systems at Cheyenne Junior League Ball Complex. As you are aware, the City and Laramie County School District #1 have been partnering to make improvements at this complex in order to host the District's new High School Girls Softball program. The program launched this spring, and other than uncooperative weather, I believe the inaugural season was a success. Adding the scoreboards and sound system enhancement is the next step in renovating this complex.

The project will follow the city's bidding process and we will oversee the implementation of the project.

If you have questions or need additional information about our application, please contact me.

Thank you for your consideration of this application, for your many years of past support, and for our ongoing partnership.

Sincerely,

Teresa Moore
Director

CHEYENNE COMMUNITY PUBLIC RECREATION DISTRICT
PROJECT SUBMISSION FORM

School, Department or Government entity requesting project: City of Cheyenne Community Recreation and Events

Please complete the following questions on a separate sheet of paper and attach to the project submission form with required signatures.

- 1) Describe the need for the requested project based on the current situation.
- 2) Outline your proposed resolution to the above stated need. (i.e. scope of work, equipment, time frame, other mitigating factors)
- 3) Who in LCSD #1 and the community will benefit from the project? (i.e. specific groups/users, general public, visitors, community-wide residents, etc.) Approximately how many people will benefit from the project?
- 4) Provide an itemized list of project equipment and cost. If there is a specific source/vendor you would like to use for your project, please identify. Please also include any PTO, activity or general funds and in-kind donations that will be contributed to the project. If you would like assistance preparing your cost estimate, please contact any of the personnel listed in the application instructions.
- 5) Provide contact information for all project sponsors, including summer contact information.
- 6) Please attach project documentation (i.e. catalog pages, vendor information, pictures, maps, drawings, etc.)

Cheyenne Junior League Complex Scoreboard & Sound System

Project Need

The Cheyenne Junior League Athletic Complex is a 30-acre sports facility with nine fully operational softball and baseball fields. Every year, the CJL Complex which is located at Dell Range Boulevard and Converse Avenue registers almost 600 boys and girls, ages 5-12, to participate on one of the 40 youth teams across four divisional age groups. WYCO Baseball, WYCO Softball, Cheyenne Mustangs, and Extreme Girls Softball call the CJL Complex home. Management is anticipating a 10 percent increase in registrations by next year which will necessitate ten additional teams for a total of 700 players. In addition to these youth leagues, the CJL Complex also hosts Laramie County School District 1's High School Girls Softball program, providing practice and competition facilities for another 135 athletes.

The City is in need of digital scoreboards and distributed speaker audio systems to enhance engagement and the overall player and participant experience.

Proposed Resolution

The CJL Athletic Complex Storage Shed project will provide a necessary component to the support infrastructure with the installation electronic scoreboards and distributed speaker audio systems in three of the fields. Bid information was used as source documents for the project budget.

If awarded, the project will immediately go through the City of Cheyenne's bidding process so that work, weather permitting, will be completed by Fall 2021. Grant funds will purchase three electronic scoreboards and all necessary components for the distributed speaker audio systems.

Project Beneficiaries

Anticipated usage for the CJL Complex between youth sports and the Laramie County School District 1 could reach 1,000 athletes within the next year or two. The scoreboards and sound systems will be utilized by spectators, athletes, coaches, volunteers, city staff, and other support staff who utilize the three fields.

DAKTRONICS SS-200 Application Guide

Budget Pricing Estimate

The **SS-200** distributed speaker audio system is a first of its kind for Daktronics and is utilized differently than traditional point source systems Daktronics is accustomed to installing for sporting venues. This compact, more cost-effective system is tailored for smaller facilities or facilities where sound "spill" into neighboring communities is undesirable.

The Daktronics SS-500HD, SS-1500HD, and SS-2000HD are point source audio systems designed to project sound over long distances, up to 500' (152m), while maintaining usable output. "Usable output" is loosely defined as 85dB SPL in spectator seating sections, which is typically enough to overcome ambient crowd noise and allow facility announcements to be heard clearly.

Distributed systems like the SS-200 are considered short throw, with usable output up to 120' (37m). This means the speakers need to be mounted near the seats they are intended to cover, unlike point source speakers that are mounted far away, often on top of video display/scoreboard structures.

SS-200 speakers are intended to be mounted to a press box, backstop netting poles, or lighting poles, NOT SCOREBOARDS.

Note: Daktronics assumes no responsibility for the structure's integrity. The engineer responsible for the attached-to base structure shall evaluate the adequacy of their structure to support the gravity loads imparted by the cabinet at each attachment point in combination with other associated loading conditions. Daktronics assumes no responsibility for system damage or injury resulting from installation methods that deviate from attachment details specified on shop drawings. Daktronics also assumes no liability for system damage or injury resulting from incorrect setup or lifting methods performed by non-Daktronics employees.

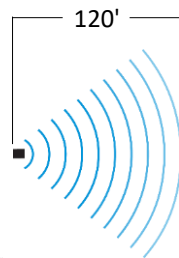

This document provides **examples** of proper and improper use of SS-200 speakers. Use the **INDEX** to jump to the section that describes the mounting type you plan to use at the facility. Use the **LEGEND** to identify the various elements on the baseball field graphics. Note that image elements are not to scale.

INDEX

LEGEND

- SS-200 (SPK-CX-1001) Speaker:

The speaker output arched lines represent the effective coverage area of each speaker. It is the same in the vertical axis as the horizontal, shaped like a megaphone emanating from the speaker. There is still sound outside of this area, but speech can be muffled and become unintelligible during high ambient sound level.

- Seating:

- Press Box:

- Field Lighting Pole:

- Backstop Netting Poles:

PROPER

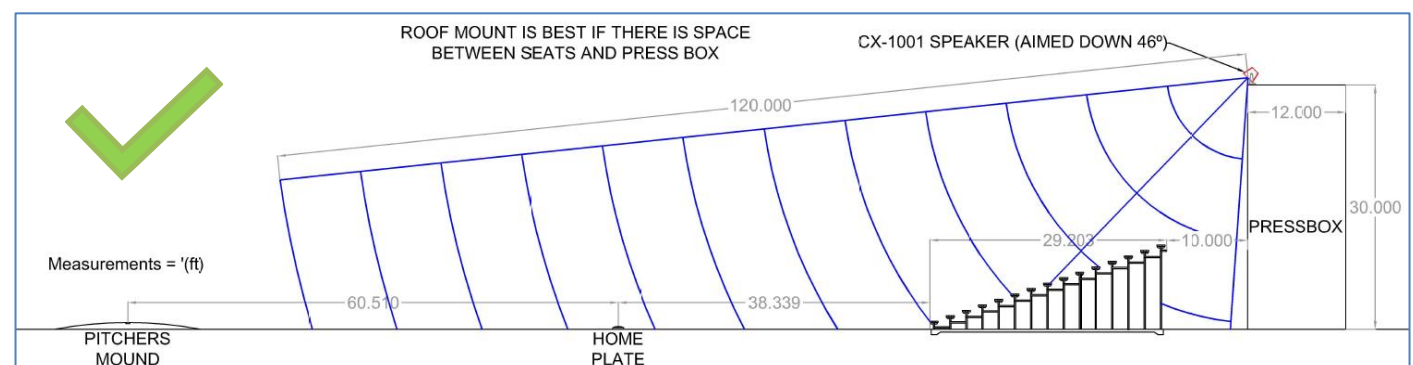

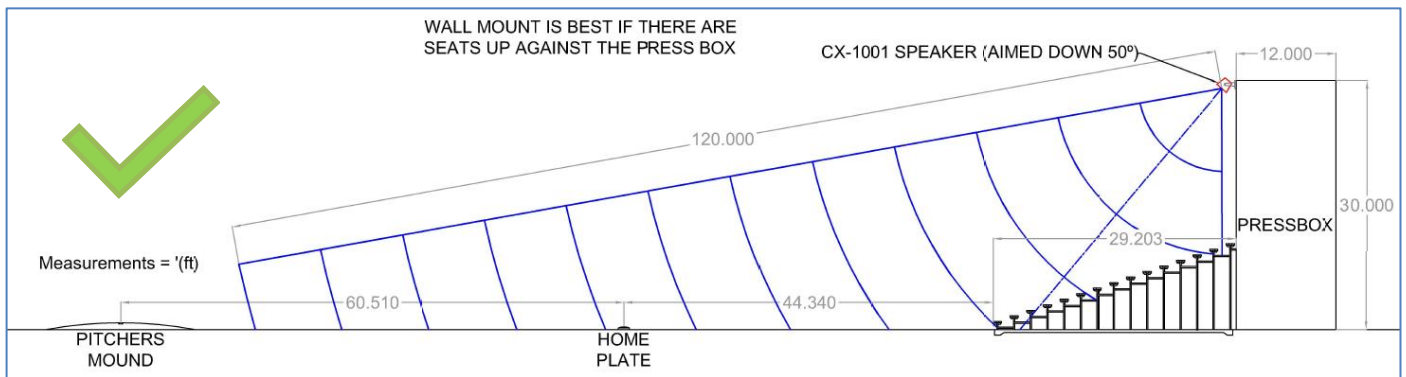

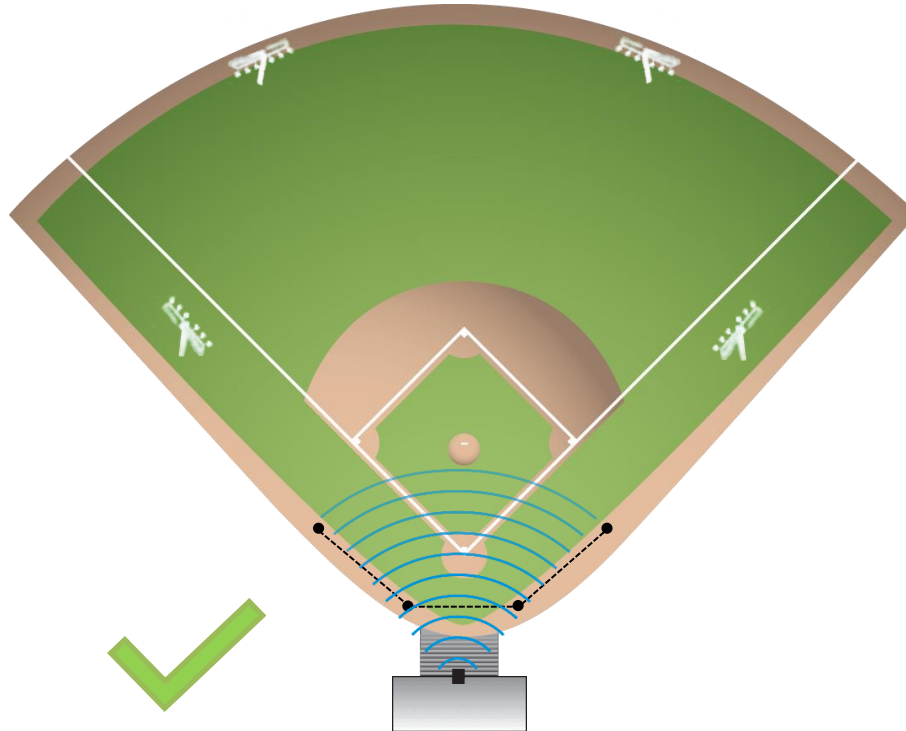

IMPROPER

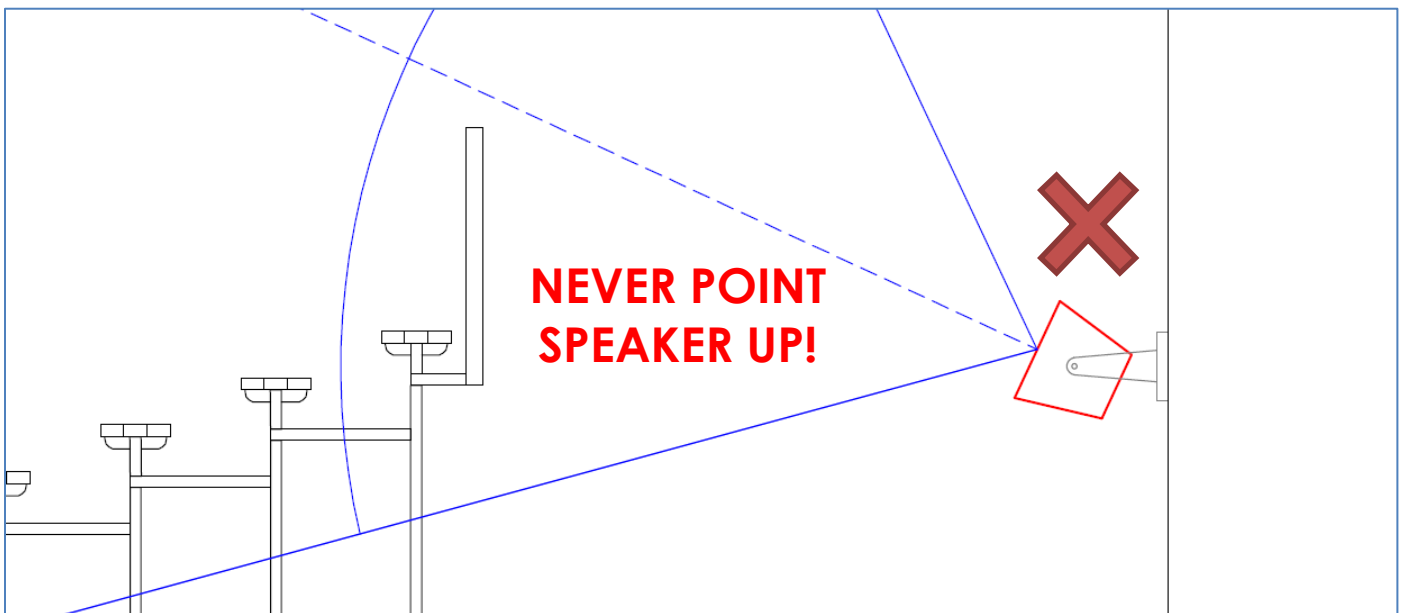

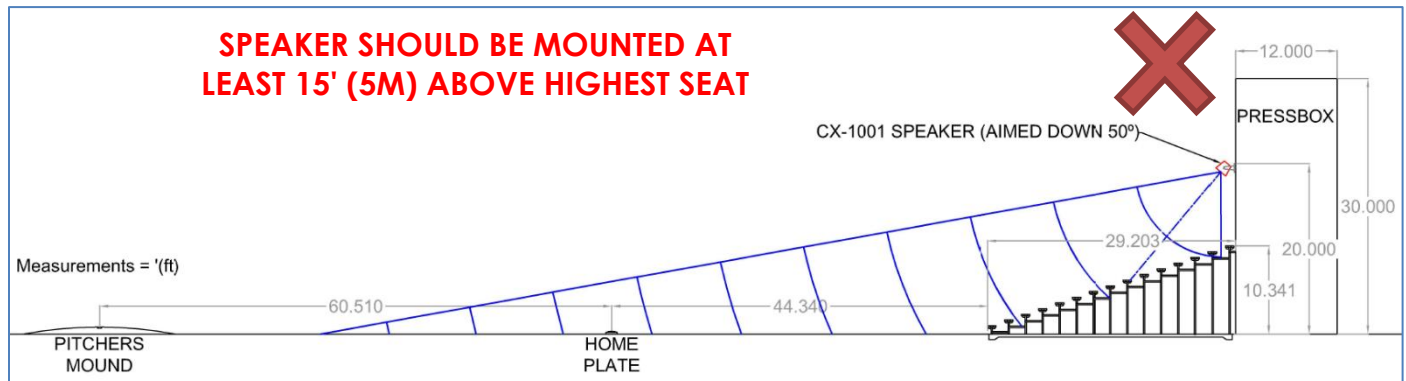

PRESS BOX MOUNT

One (1) speaker system

- Speaker mounted on wall of press box or on edge of roof, depending on whether there is space between the seating and press box
- Aimed at first (bottom) row of seating
